Start Meetings

Start Vmeeting

PC Guide

Start Vmeeting and Introducing Vmeeting

Launch Vmeeting at vmeeting.io!

URL : <https://vmeeting.io> (In Korea)

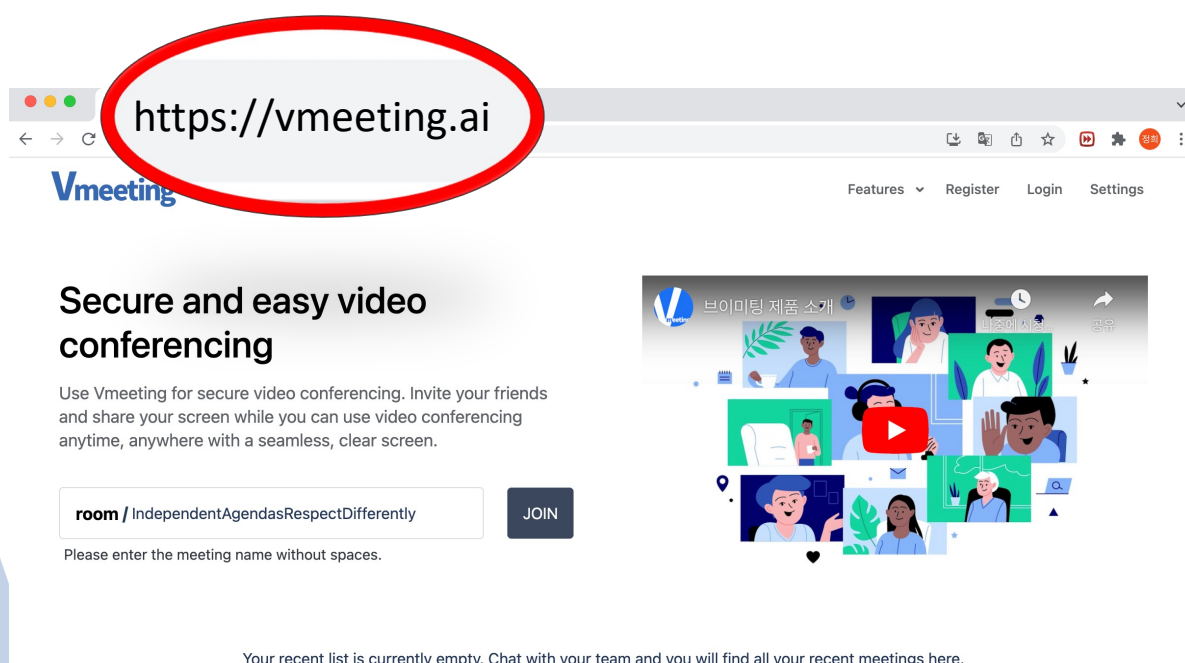

<https://vmeeting.ai> (Other Region)

Vmeeting supports both Windows and MacOS.

We highly recommend using Chrome browser for Windows Users and MacOS Users.

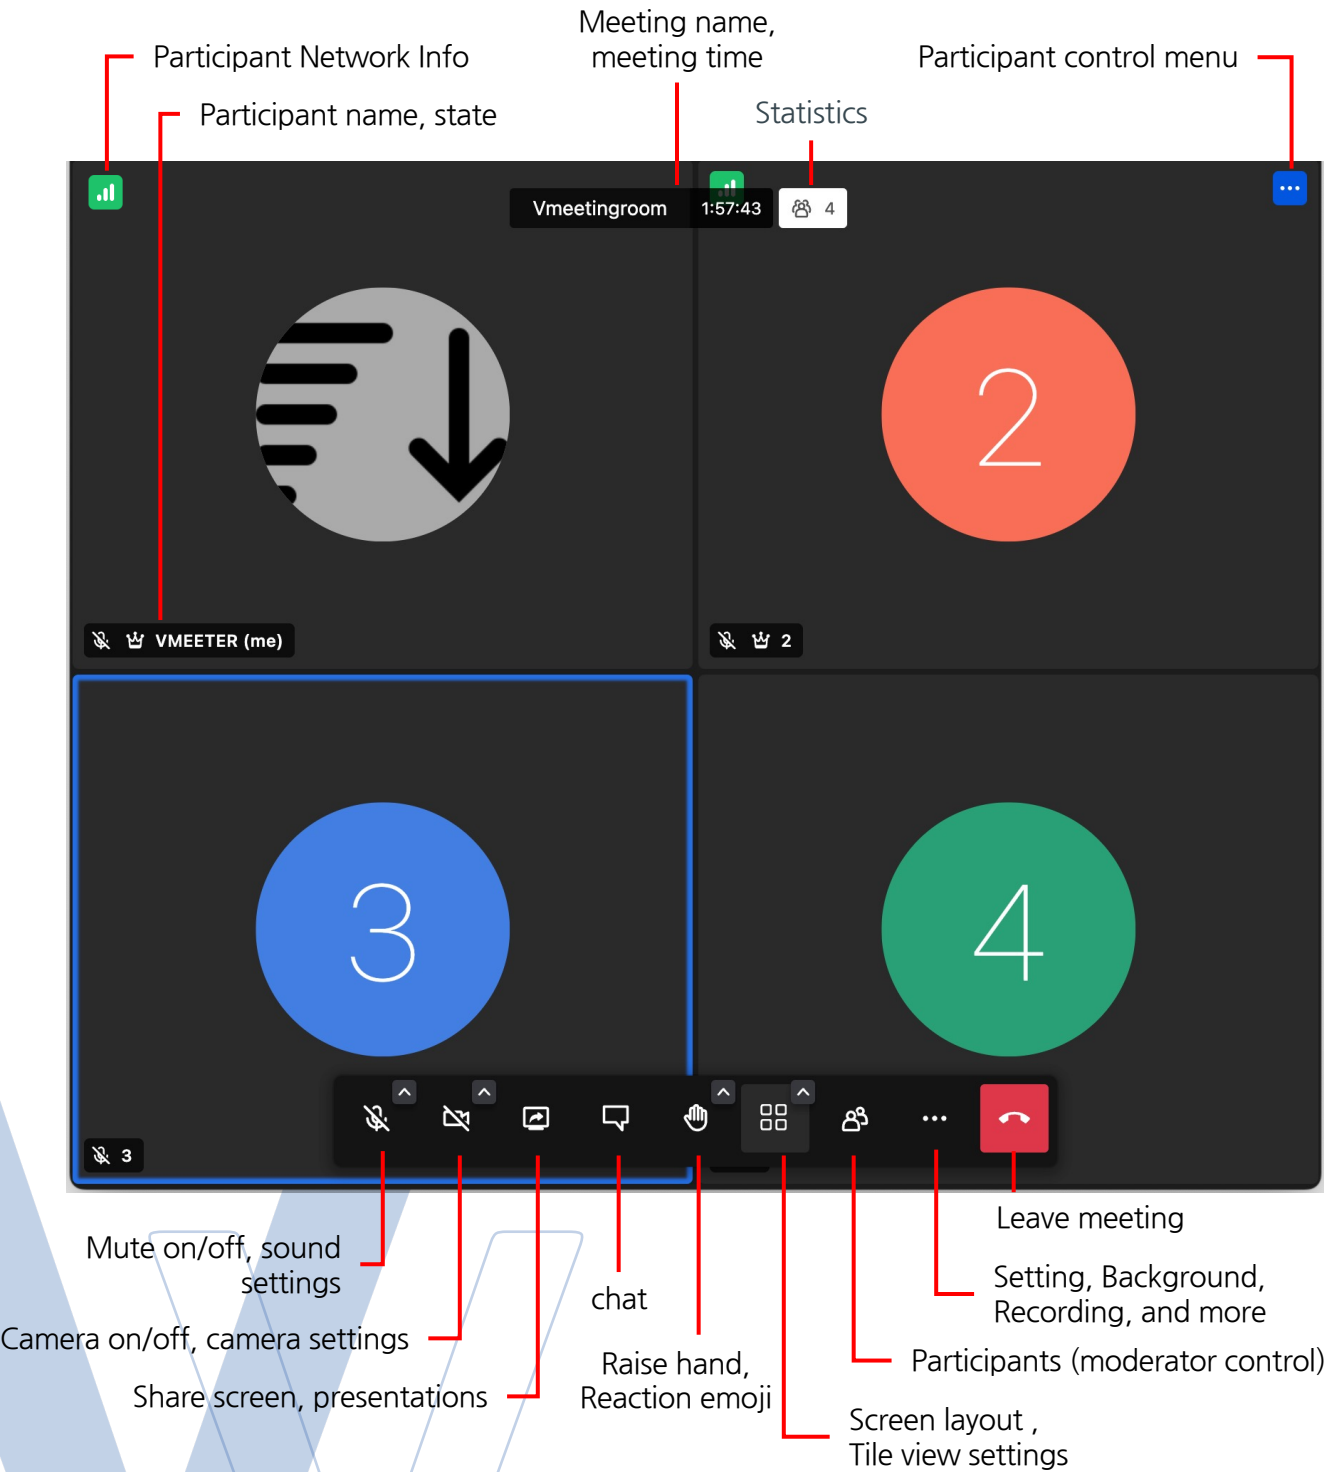

Register or login to access meeting setting & controls and main features.

Users can also host meetings or view meeting history.

Meeting screens and features

Vmeeting is optimizing for user convenience and easier control.

Create New Account & Login

PC Guide

Creating new account

You can either create an account with us or use Single Sign On (SSO) service to log in.

- Use Single Sign On (SSO)

1. Click **[Register]**
2. Select a service account you wish to sign in with
3. Enter email(ID) of the service and password

- Register with us

1. Click **[Register]**
2. Enter your name, e-mail, username, and password
3. Enter Capcha and click **[Verify]**
4. Click **[Register]**

Please make sure to use a valid e-mail address as:

- URL for recorded meetings will be sent to this e-mail
- URL for Password Reset Verification will be sent to this e-mail

PC Guide

Settings

Users can select and change settings for the meetings.

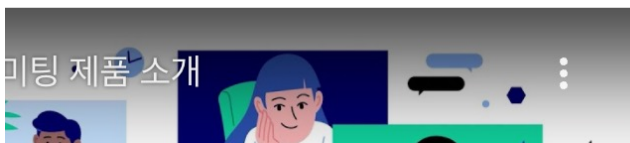

Features ▾

Register

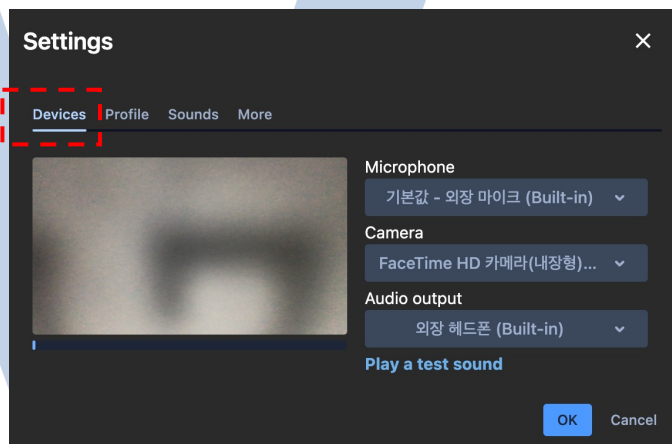

Login

Settings

Select **[Settings]** to adjust settings for devices (microphone, camera, speaker), profile, notifications, etc.

Users can also moderate settings during meetings by selecting **[More]** - **[Settings]** from the navigation panel.

Device

Select and set camera, microphone, and speaker devices for future meetings.

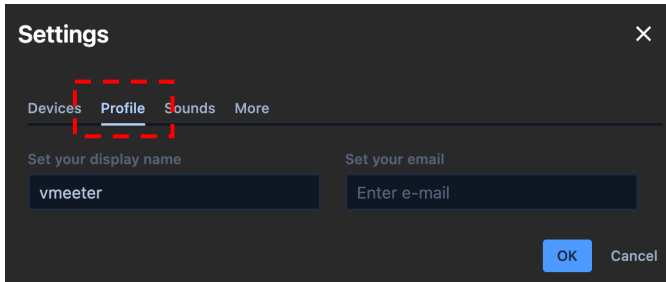

Includes:

- Screen Preview to test camera
- Audio Input to show audio gauge
- [Play a Test Sound] to test speaker of the devices

Profile

Users can edit display name and e-mail:

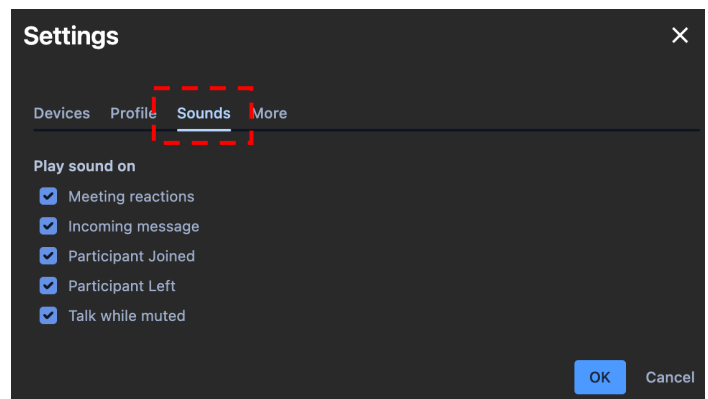

- Display Name : Title to be used during meeting
- Email : Contact information to be used during meeting

Sounds

Users can turn on notifications for various events including:

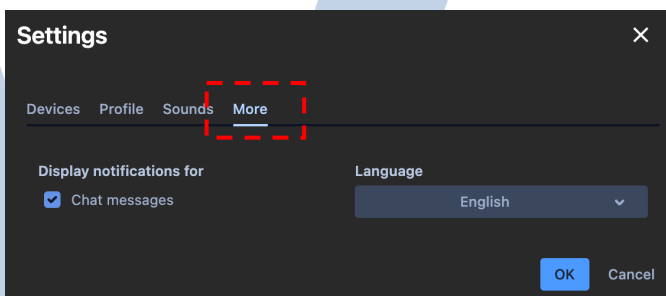

- Meeting Reactions
- Incoming Message
- New Participant Arrival
- Participant Exit
- Talk while muted

More

Other setting options includes:

- Chat Messages: Turn on/off notifications for chat messages
- Languages : Select languages for Vmeeting

Host Meetings & Invite Users

PC Guide

Start Conference

Users can host meetings on web without any additional downloads.

Simply enter conference name and click **[Go]** to host a meeting.

※ Please note that if there has already been the same conference name previous created, an existing conference will automatically re-open.

※ Users must register or login to host a meeting.

- All conference names must be combinations of numbers, Korean alphabet, alphabet, and '_' (underscore).
- Random name will be assigned to meetings without names.

Features ▾ vmeeter 1 ▾ Settings

Secure and easy video conferencing

Use Vmeeting for secure video conferencing. Invite your friends and share your screen while you can use video conferencing anytime, anywhere with a seamless, clear screen.

room / LivingMechanismsConstructBravely

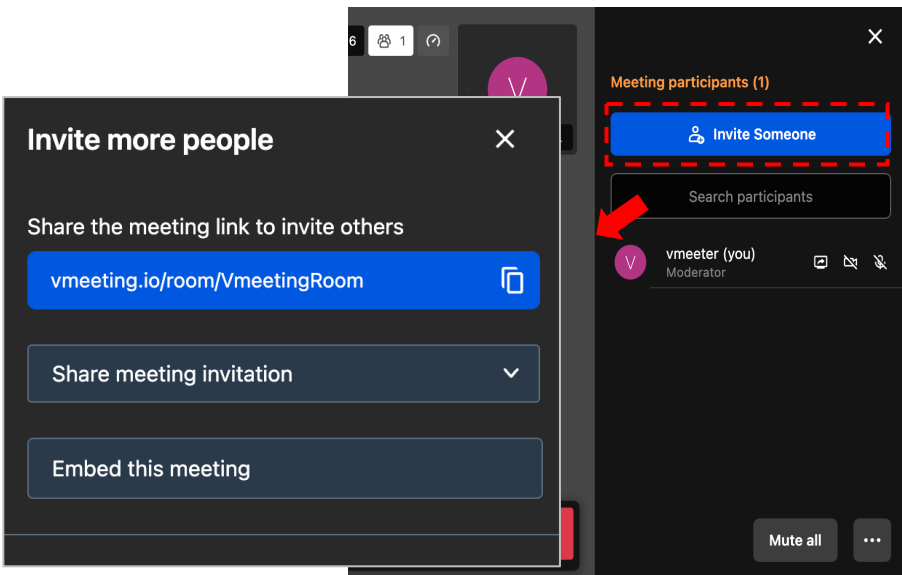

GO

Please enter the meeting name without spaces.

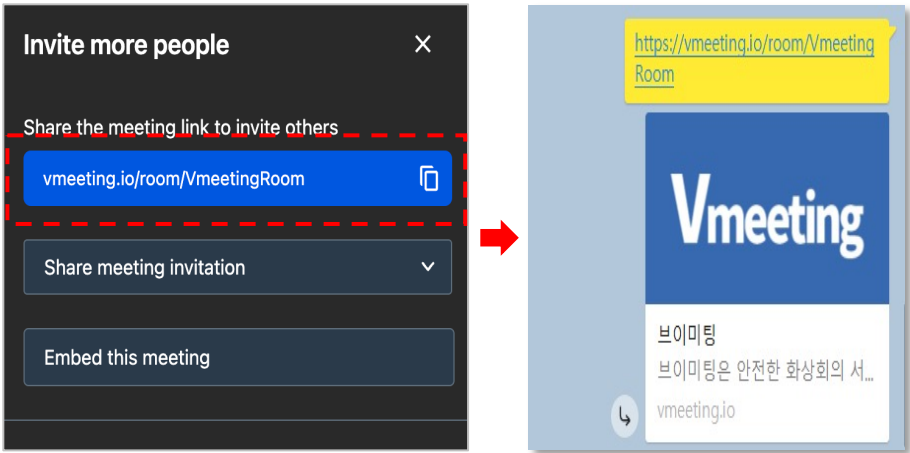

Your recent list is currently empty. Chat with your team and you will find all your recent meetings here.

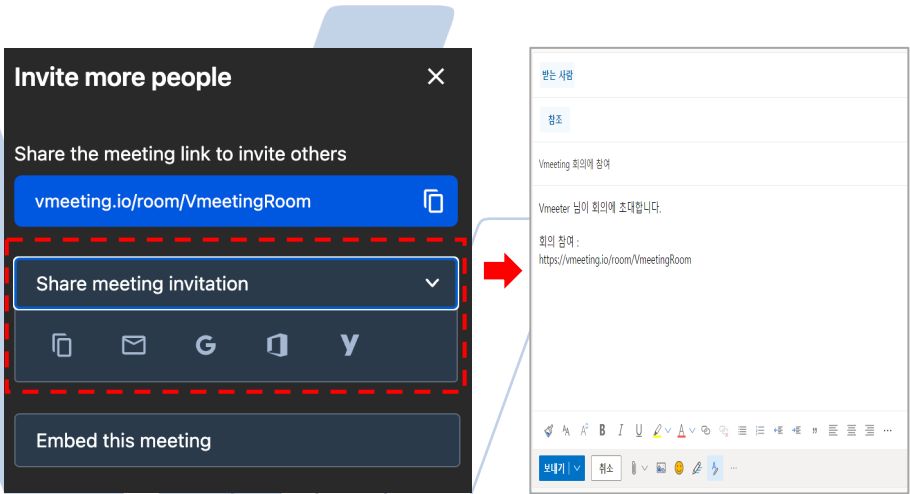

Invite Others

Select **[Participants]** from navigation panel and click **[Invite Someone]** to invite more participants.

Copy meeting link to share via KakaoTalk, LINE, etc. Participants can use link to directly join meeting.

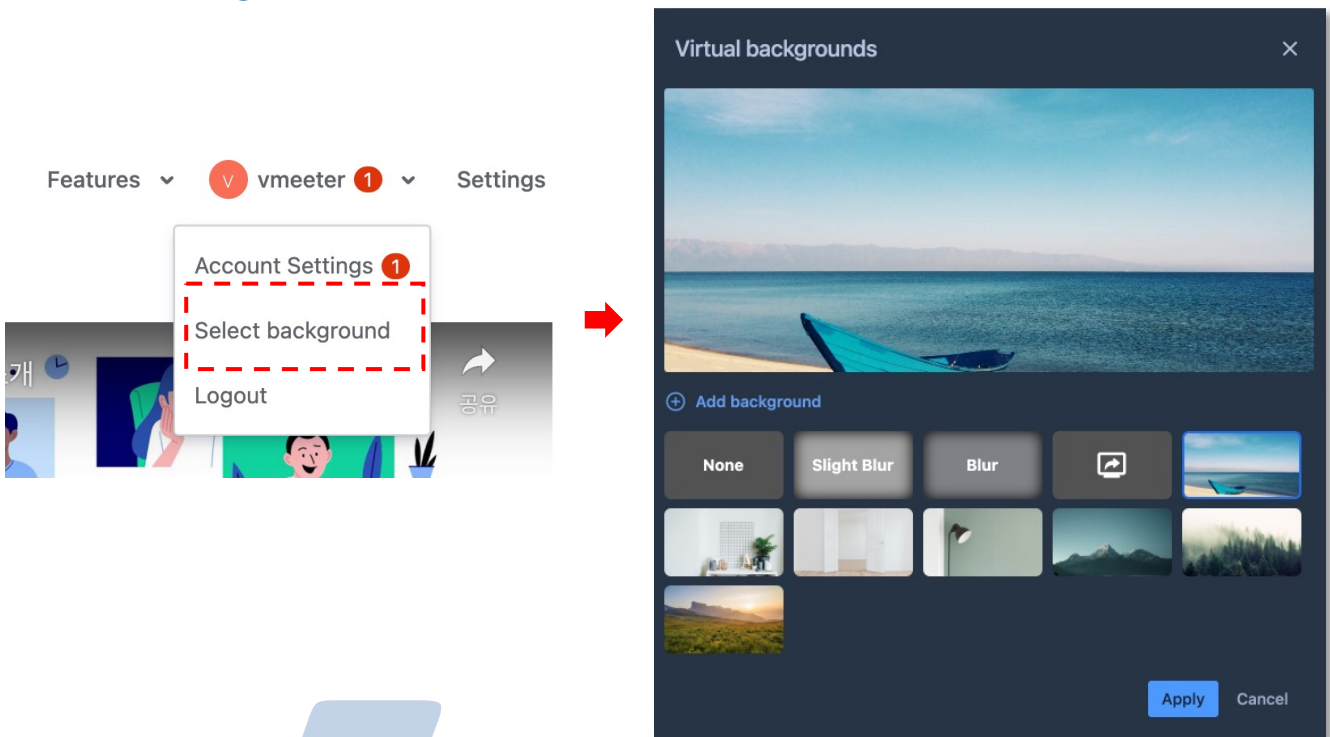

Users can also share meeting invitation via email.

* For more information, refer to 'More – Embed Meeting'

Set Virtual Background

PC Guide

Select Background

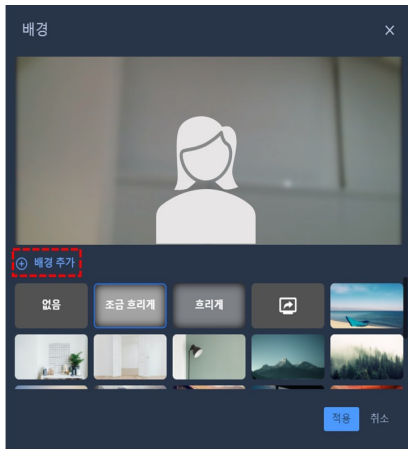

Vmeeting allows users to set virtual background for conferences.

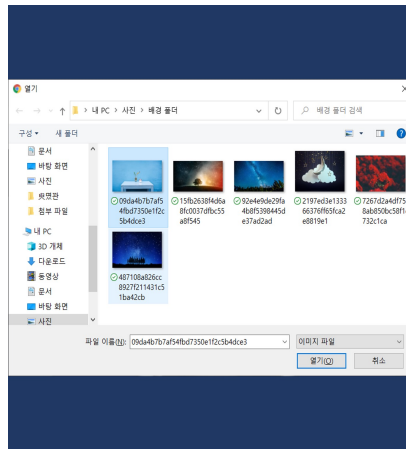

Select **[Account]** - **[Select Background]** to set or upload more images for virtual backgrounds.

Users can also modify background image during meetings at **[More Actions]** - **[Select Background]** on the navigation panel.

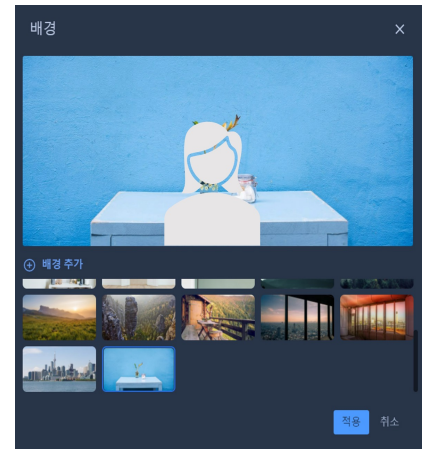

Add Background

1. Select **[Add Background]**

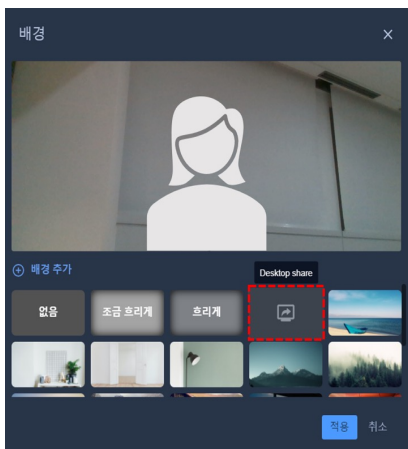

2. Choose Desktop Folder
3. Choose image to upload
4. Click **[Open]**

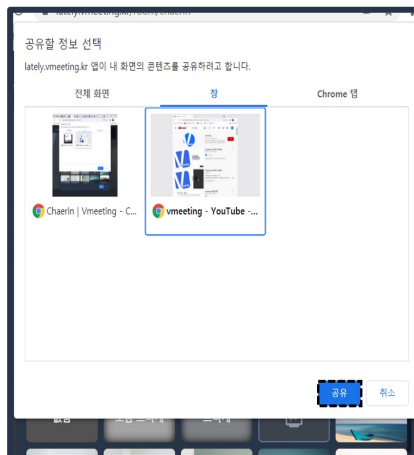

5. Confirm added image
6. Select image and click **[Apply]**

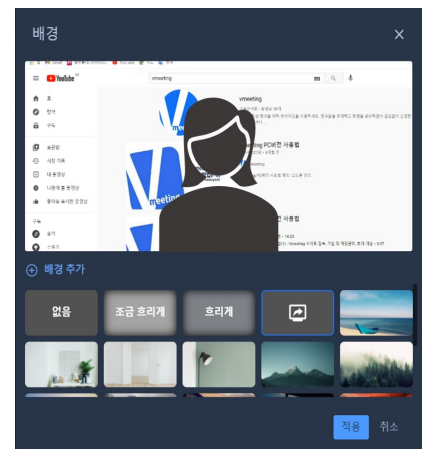

Shared Screen as Background

1. Select **[Desktop Share]**

2. Choose what to share among Entire screen, Window or Chrome Tab
3. Click **[Share]**

4. Confirm that shared content appears as background
5. Click **[Apply]**

Utilities

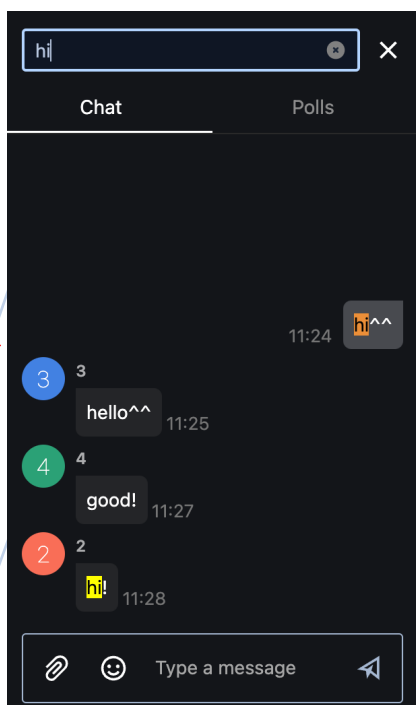

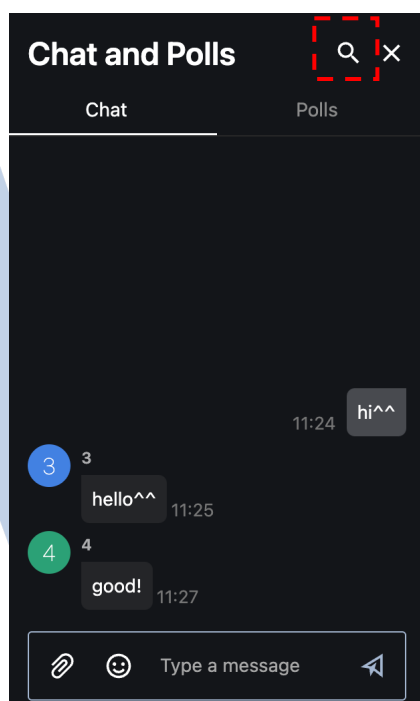

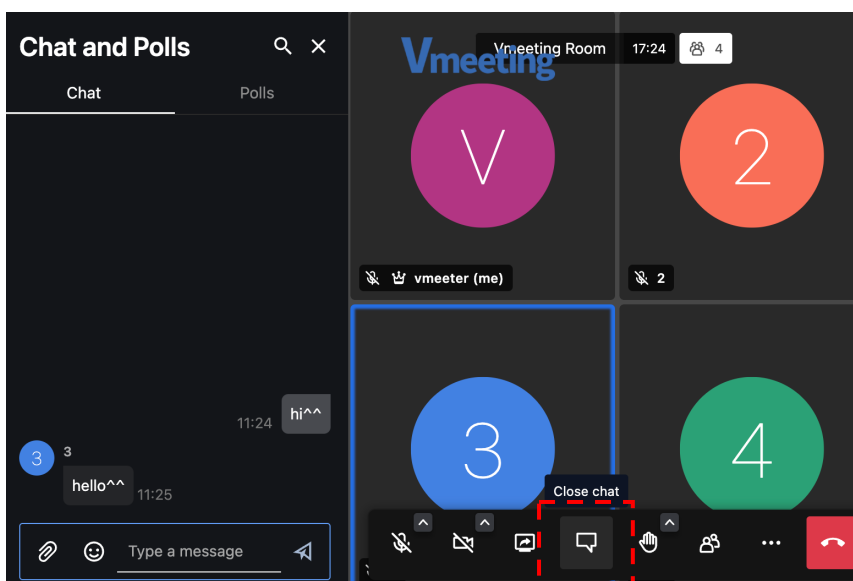

Chat and Polls

PC Guide

Send Messages

Users can send messages to all participants or send private messages to individuals.

Select **[Open/Close Chat]** from dock to toggle Chat panel.

Search Messages

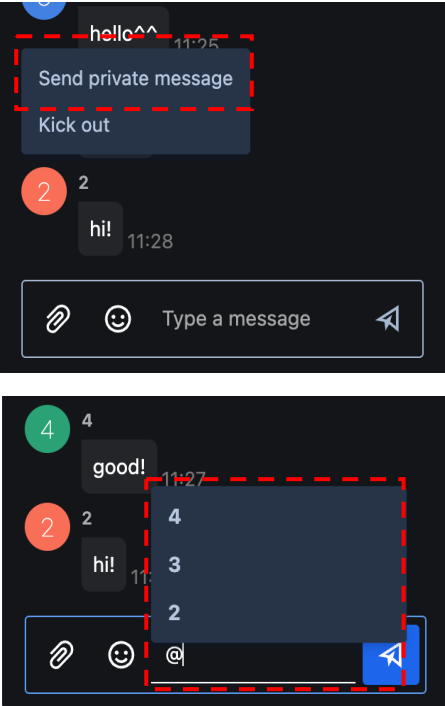

Users can search keywords by clicking the search icon located on top of the Chat panel.

Search keywords will be highlighted in yellow.

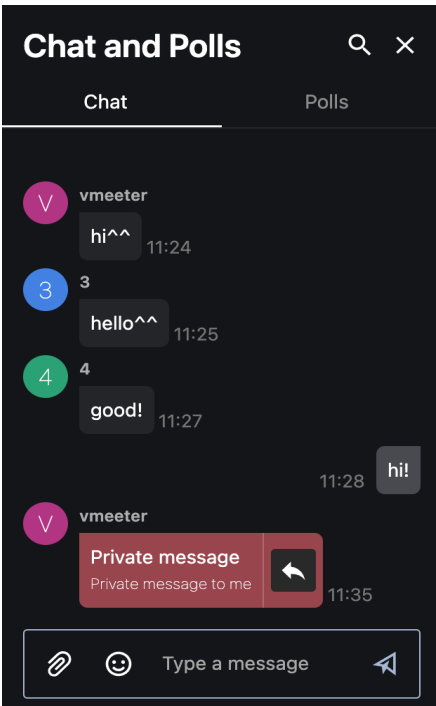

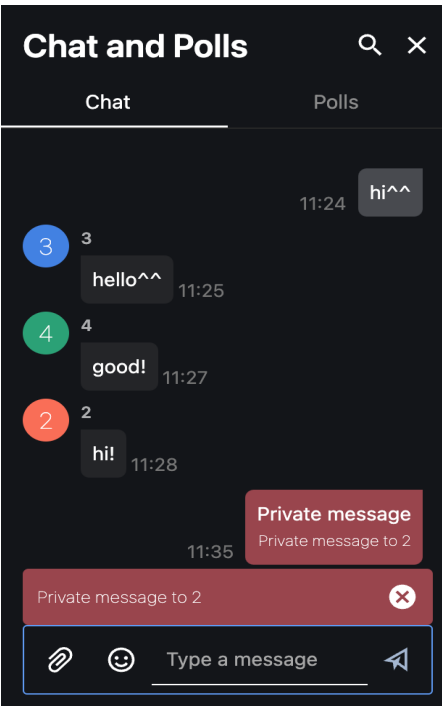

-Orange indicates current position.

-Press enter key to continue searching.

Send Private Messages

[Sending Private Messages]

[Receiving]

Users can send private messages by typing '@' and either type in or select the user(s) they wish to send private messages to.

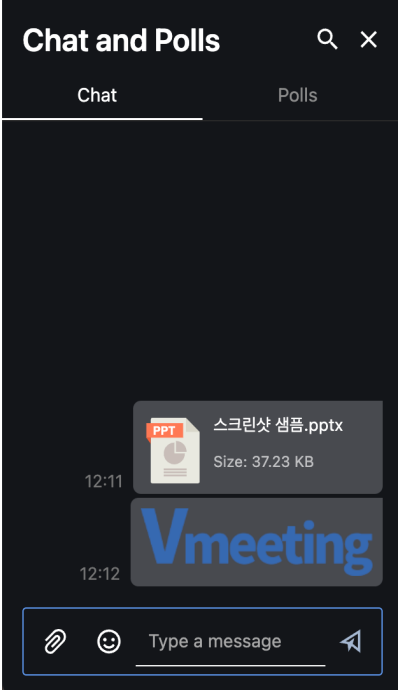

Users can also send private message through **Participants - [Setting(...)] - [Send Private Messages]**.

Send and Share Files (Documents, Pictures, Videos, etc..)

[Sharing Files]

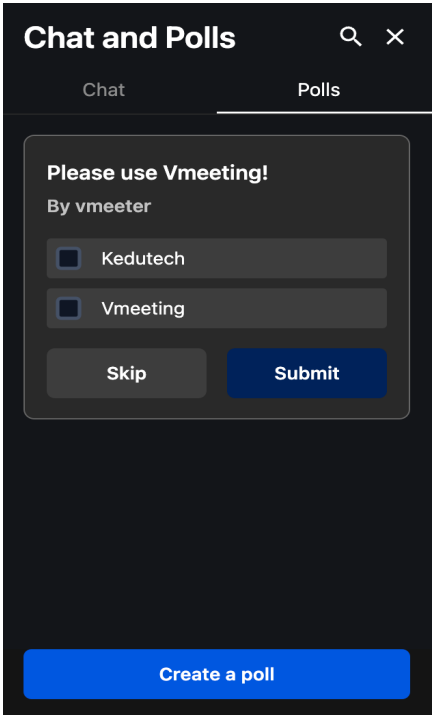

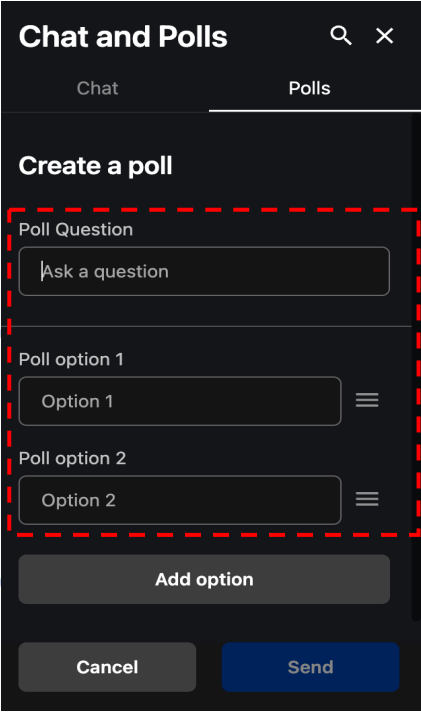

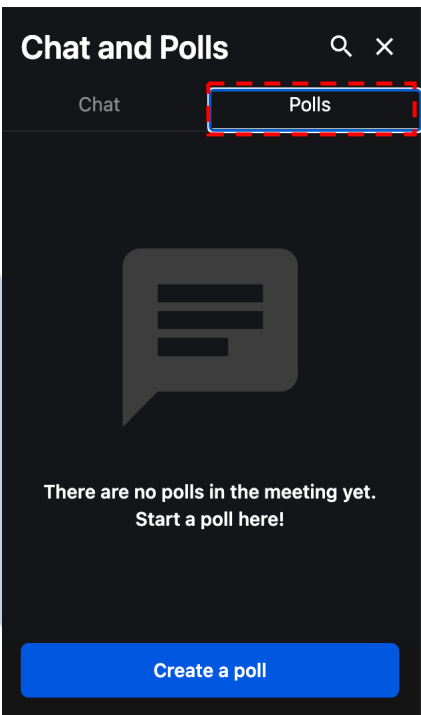

[Downloading Files]

Users can share files to other participants by select **[File Upload]** Icon or **Drag and Drop** files to chat. Other participants can download the files by clicking the uploads.

Create a Poll

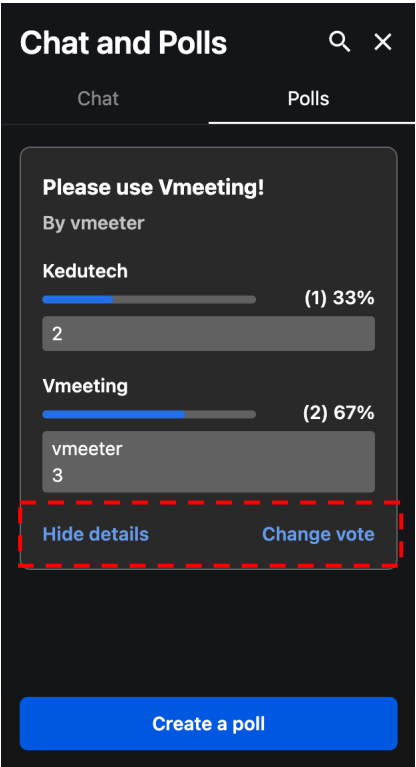

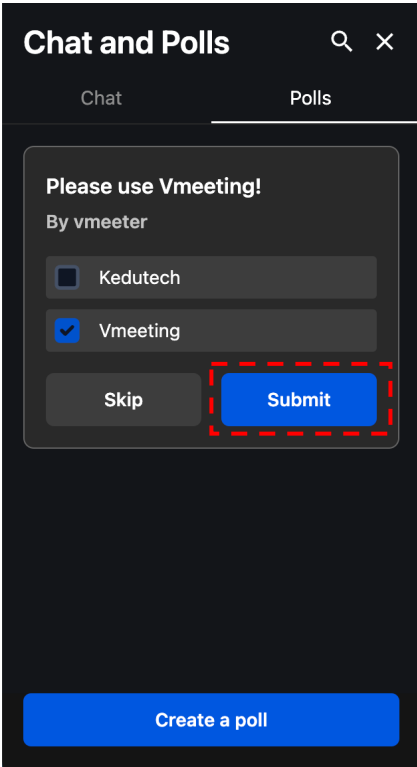

Users can create polls by [Open Chat] – [Polls]tab – [Create a poll] – Enter Poll Question and option(s)– [Send]

Vote/ Show Results

Voting will be completed once the user **select options(s) and click [Submit]**. Users can change vote by selecting **[Change Vote]**.

Click **[Show/Hide Details]** to see results in more detail.

Document Sharing

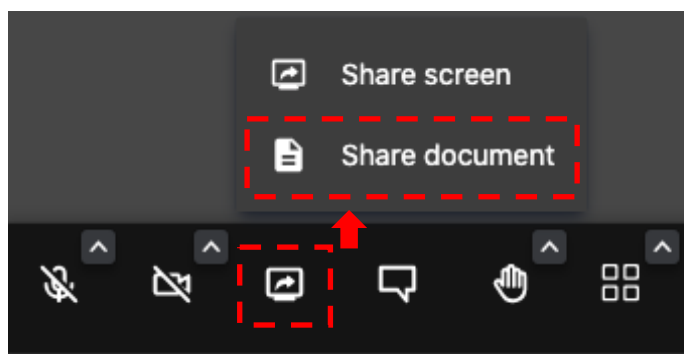

PC Guide

Document Sharing

Users can share their documents and write or draw on them in real time. All users can participate to write and draw simultaneously.

When a user starts/ends sharing document, this will be reflected on all other user's screen.

The shared document, as well as overwritten contents, will be available to download during the meeting. Once the meeting ends, they will be deleted permanently.

- Document Sharing

1. Click **[Toggle Document/Screen Sharing]**
2. Click **[Share Document]**

- End Document Sharing

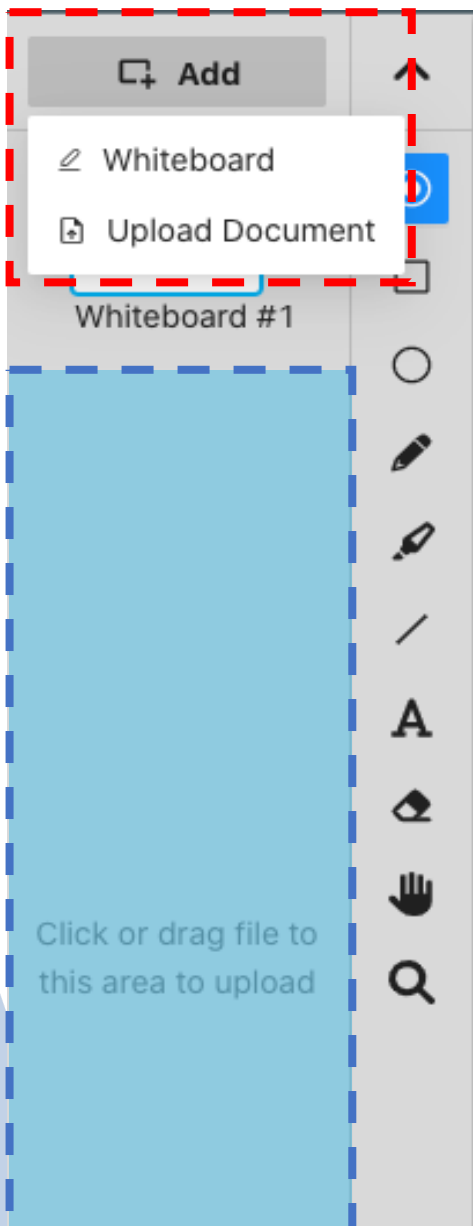

1. Click **[Toggle Document/Screen Sharing]**

Upload Document

Users can upload documents by clicking **[Add]** - **[Upload Document]** or **[Drag and Drop]**. Users may also simply open a whiteboard without sharing documents.

All other participants can draw or write on the shared documents or on a whiteboard, which will be reflected on the screen in real time.

* Whiteboard will be restricted if the user is disabled for [Document Sharing] by host.
(See [Host Controls])

- Add

1. Click **[Add]**
2. Click **[Upload Document]**
3. Select a file from **[Browse Files]**

Or

1. Drag and Drop the document file you wish you to share in the Blue area

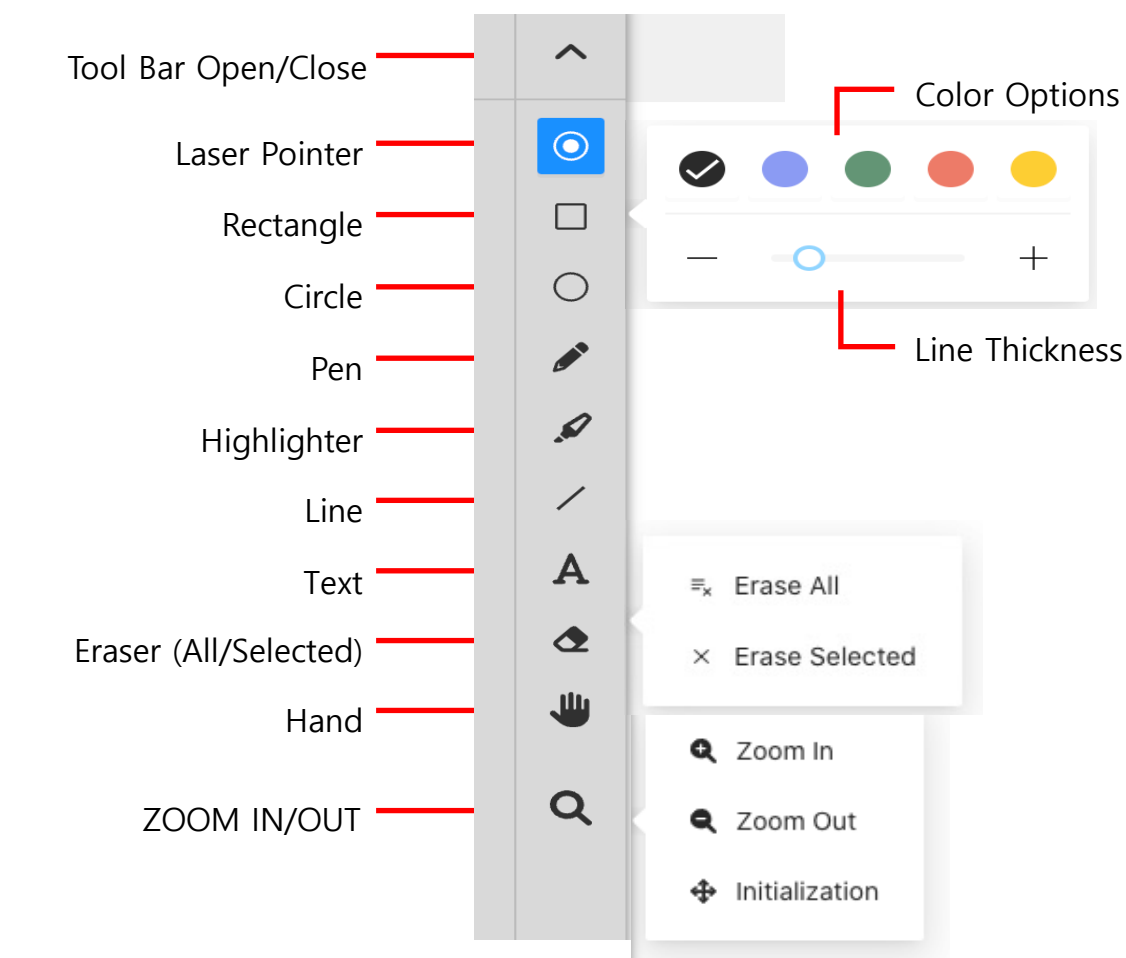

- Open Whiteboard

1. Click **[Add]**
2. Click **[Whiteboard]**

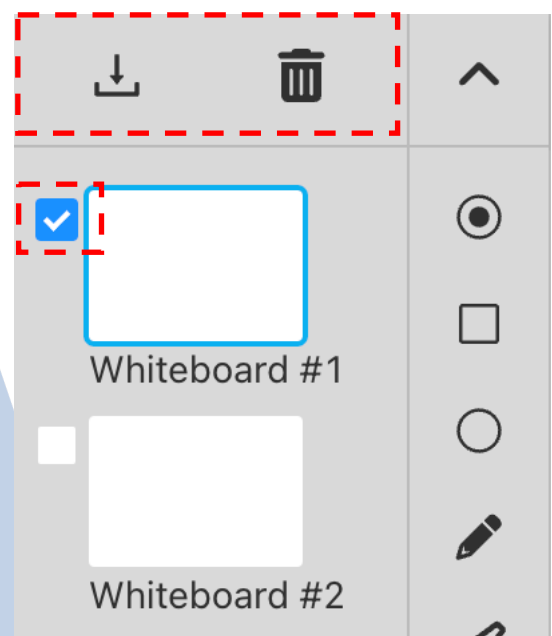

- Compatible document format and size limit

1. Document Size : Up to 100MB
2. Compatible File Formats:
PPT, PDF, XLS, DOC
PNG, JPG, BMP, GIF

Tools

Download / Delete

Once you tick the checkbox next to the document, download or delete icons appear.

- Download

Download will start once you tick the checkbox and click **[Download]**.

Documents with the overwritten components are converted into PDF to download.

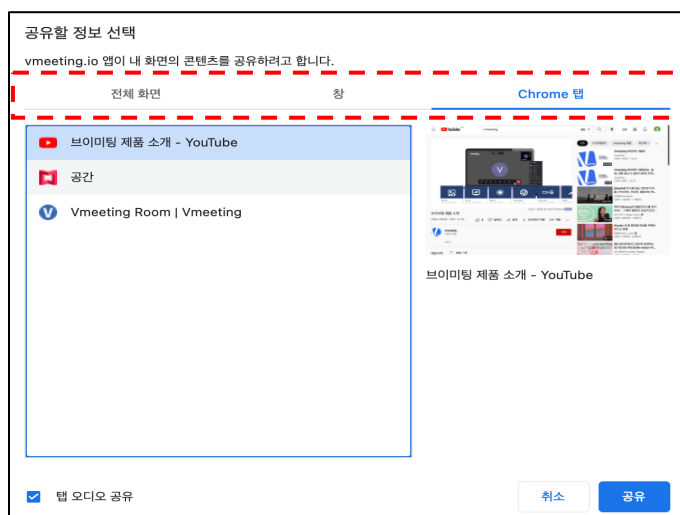

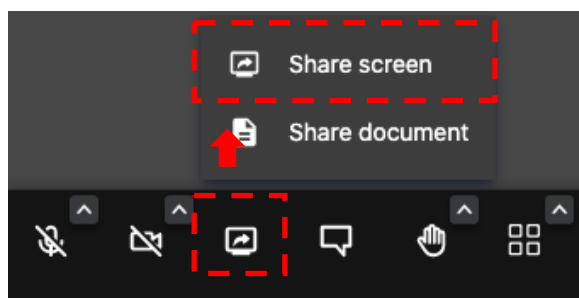

- Delete

Document will be deleted once you tick the checkbox and click **[Delete]**.

Screen Sharing

PC Guide

Screen Sharing

Users can share screen, documents, video, web browser, etc. with other participants during meeting.

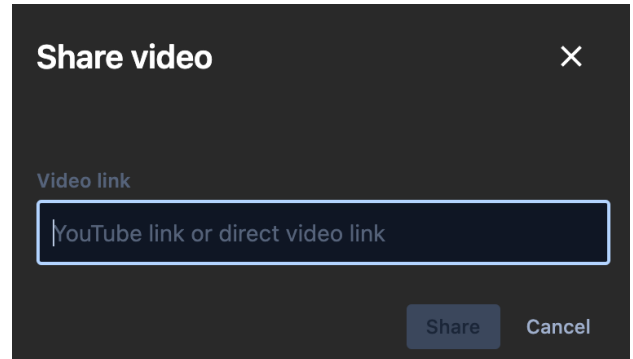

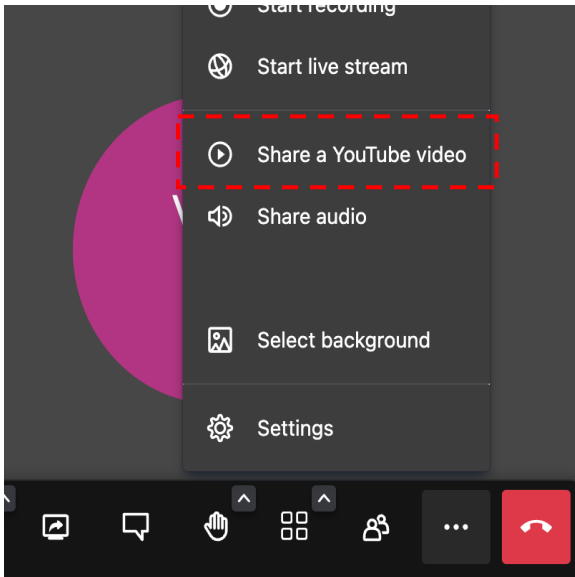

- Enable Screen Sharing

1. Click **[Toggle Document/Screen Sharing]**
2. Click **[Share screen]**
3. A window will pop up to ask what to share
4. Select contents to share from the **Share Tab**
(Tick **[Share Tab Audio]** to share audio as well)
5. Click **[Share]**

- End Screen Sharing

1. Click **[Toggle Document/Screen Sharing]**

Sharing Youtube Video

Users can also share Youtube videos along with participants.

- Start Sharing YouTube Videos

1. Click **[More Actions]**
2. Select **[Share a Youtube Video]**
3. Enter Youtube link
4. Click **[Share]**
5. Share video with participants

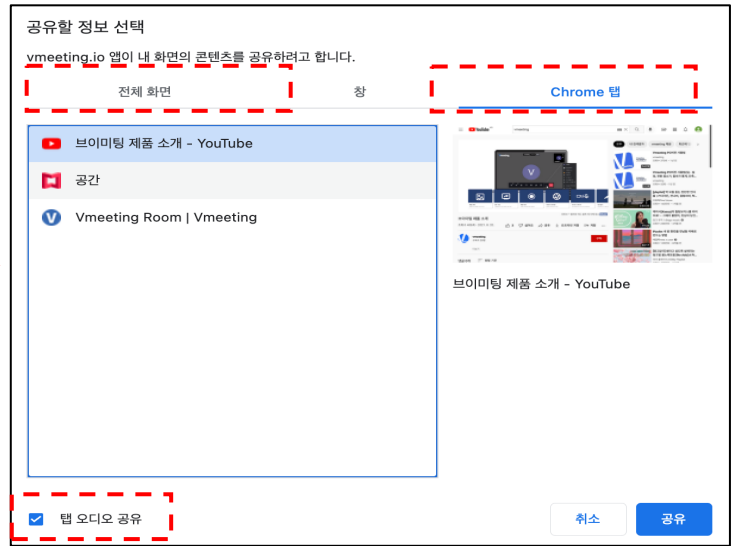

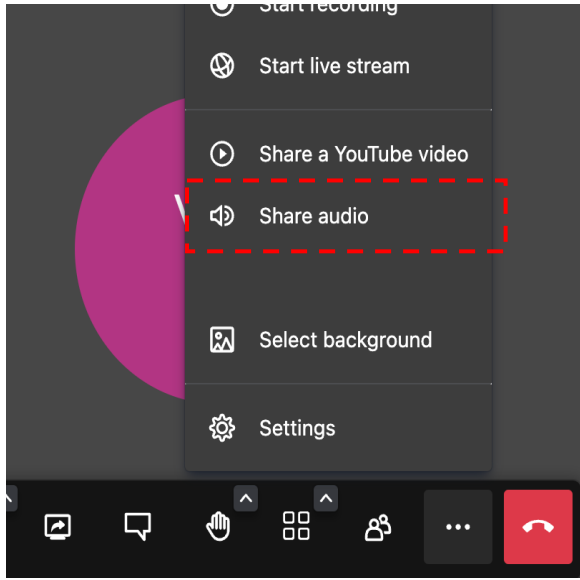

- Stop Sharing YouTube Videos

1. Click **[More Actions]**
2. Click **[Stop Video]** or
or click **[Stop]** from browser's sharing notification

Sharer can manage audio, play/pause, video position, etc. for all participants.

Please note that there may be some delays between sharer and viewers.

Audio Sharing

Users may share audio with participants.

- Start Audio Sharing

1. Click **[More Actions]**
2. Click **[Share Audio]**
3. Select audio to share
4. **Make sure to check the [Share Audio] option**
5. Click **[Share]**

- Stop Audio Sharing

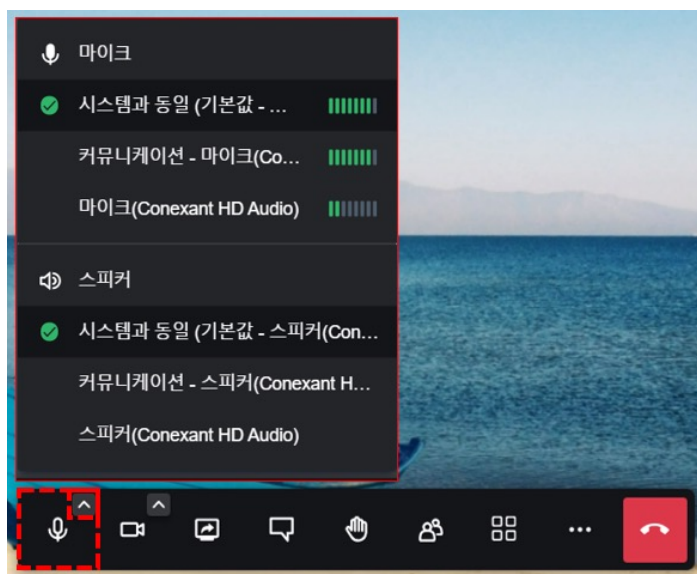

1. Click **[More Actions]**
 2. Click **[Stop Audio Sharing]**
- Or click [Stop] from sharing notification

- ※ "Couldn't share system audio!" message is displayed when user attempts audio sharing without checking the [Share tab audio] option.
- ※ All sound, including shared audio, will be muted in case user toggles [mute].

Video & Audio Setting

PC Guide

Microphone

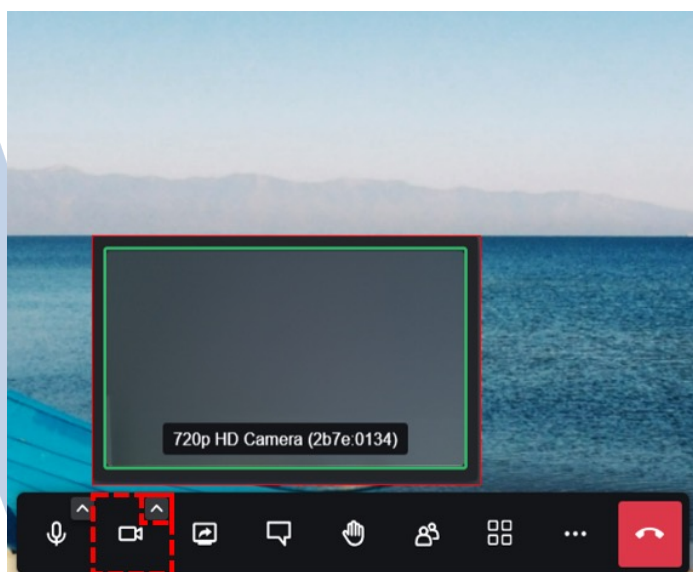

Click **[Mute/Unmute]** to toggle microphone settings.

When **[Mute]**, the icon changes accordingly and audio is not shared to other participants.

Click **[^(audio setting)]** to alter microphone and speaker settings.

Camera

Click **[Start/Stop Camera]** to toggle camera settings.

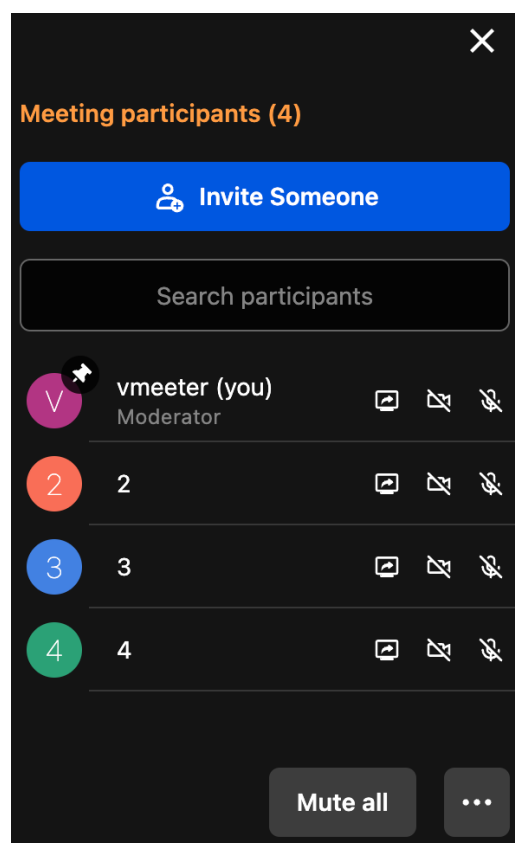

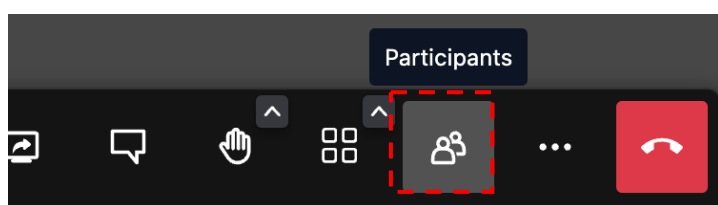

When **[Stop Camera]**, the icon changes accordingly and video is not shared to other participants.

Click **[^(camera setting)]** to alter camera settings.

Participants

PC Guide

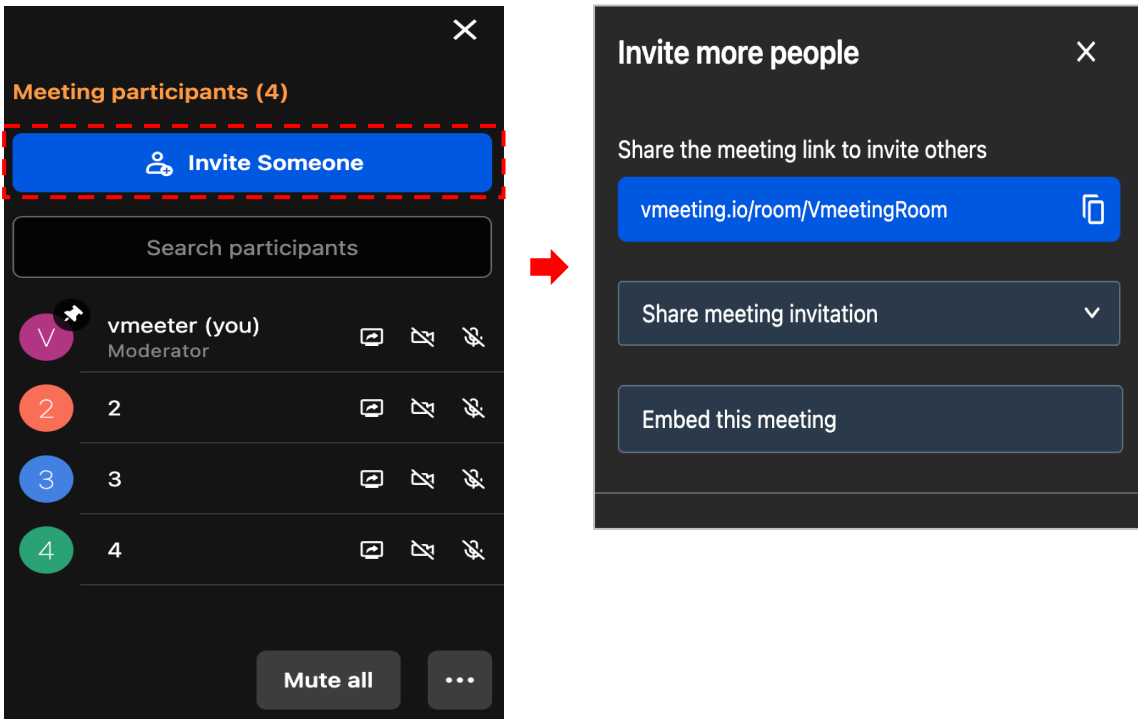

View Participants

Click **[Participants]** to open/close participant list.

Users can check participants status (mic, camera, screen share) and invite others from this panel.

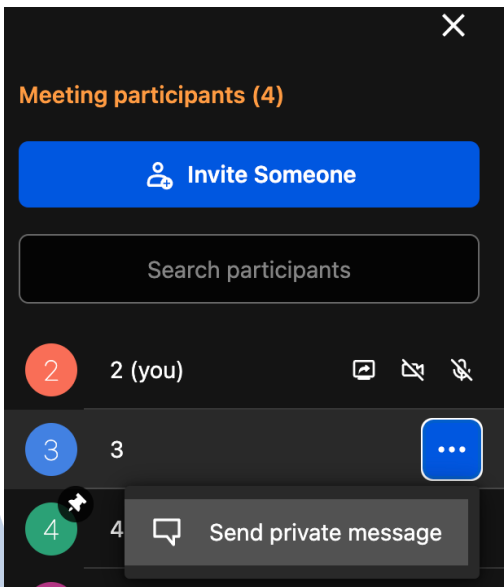

Participants- Invite User

Click **[Invite Someone]** to copy meeting URL, send e-mail invitation or embed meeting using HTML.

For more information, see the "Creating and Inviting Meetings" page.

Participants- Utilities

Users can send private messages to other participants at **Participants - [Setting(...)]**.

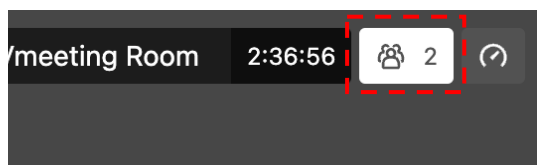

Hosts can access additional features. Further information is available at 'Host Authorities'.

* More information on 'Messaging', 'Host Authorities'.

Statistics

PC Guide

Speaker Stats

Speaker Stats			
Name	Join Time	Leave Time	Duration
vmeeter (me)	12:09:46	-	-
2	12:09:48	-	-
4	12:09:51	-	-
3	12:09:54	-	-
Close			

Users can access participation statistics for each user.

This can be viewed by clicking the people icon on top and also can be downloaded in excel format by clicking **[Download in Excel]** button.

Layouts

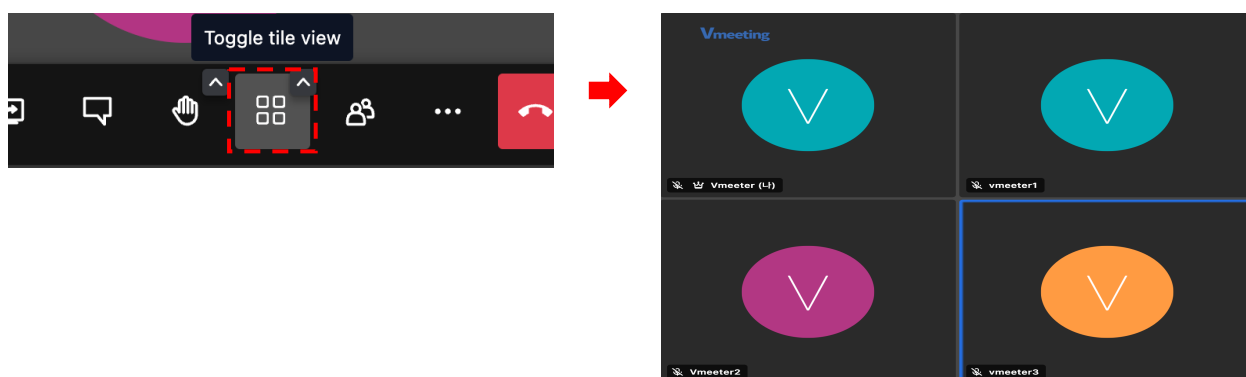

PC Guide

Toggle Tile-View

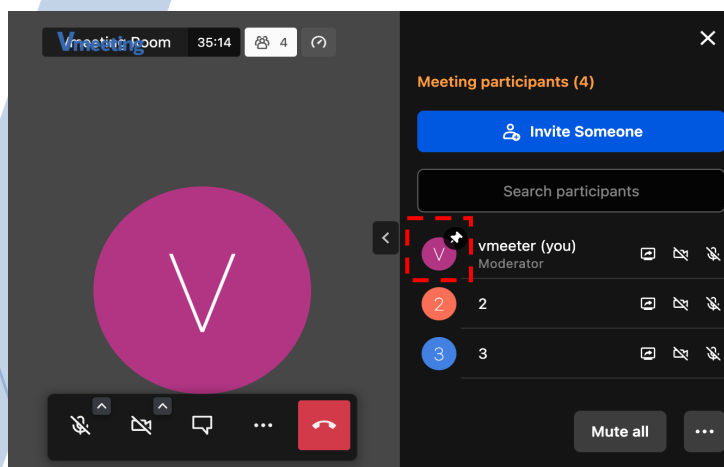

Users can adjust screen layouts according to the type and size of meeting.

- **Tile-View** : Can view all participants at once

Change to tile view by clicking **[Toggle Tile View]** from the bottom menu bar.

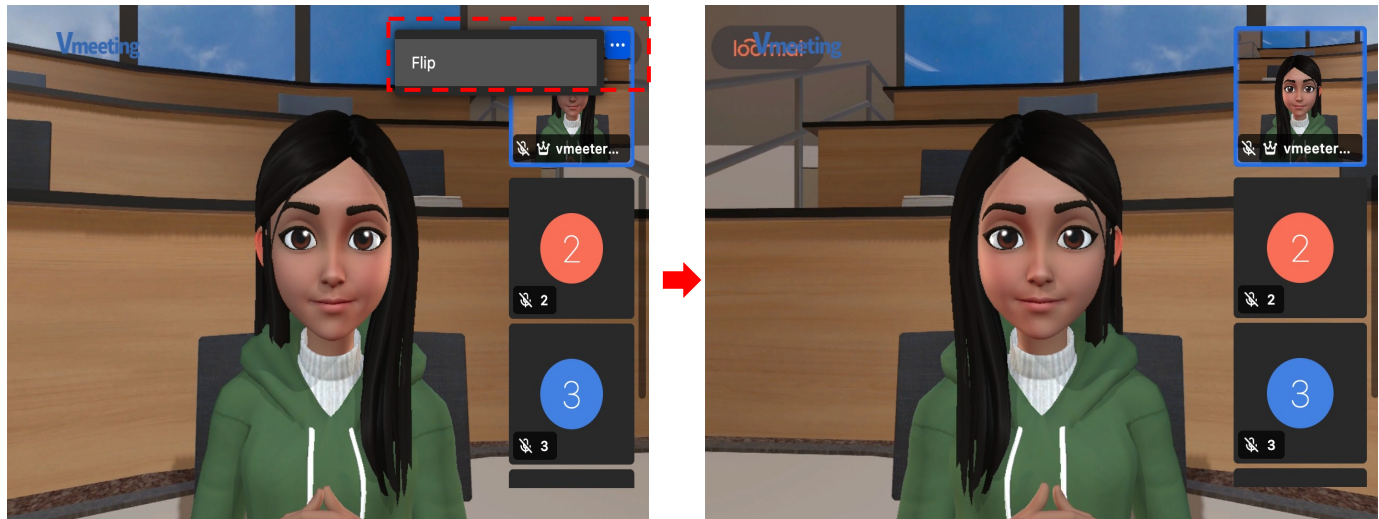

- **Lock Mode** : Can lock specific participant by selecting their screen or selecting the person from participant list (📌). A pin icon will be shown on the participant list)

- **Speaker Mode** : automatically shows the current speaker
(This mode only works when neither Tile-View mode or Lock mode is enabled)

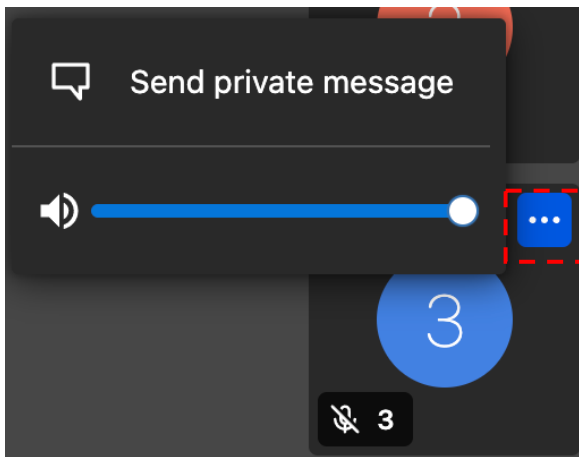

Mirror Screen

Click **[Settings(...)]** - **[Flip]** on mini-view tile to mirror your screen.

Please note that flip does not mirror other participant's view.

Thumbnail Settings

Click **[Settings(...)]** to access **[Send Private Message]** and **[Sound level]** for specific users.

Using **[Sound level]**, users can adjust audio for specific users.

Hosts can access additional features. Further information is available at 'As a Host'.

* More information on 'chat and polls' and 'As a Host'.

The screenshot shows a Vmeeeter video call window. At the top left is a green status bar with signal strength bars. The main area displays a female avatar with long black hair wearing a green jacket over a white shirt. Below the video feed is a dark control bar containing icons for mute, unmute, and a crown icon next to the text "vmeeeter...". To the right of the video call window, there are two large circular buttons labeled "2" and "3" on a dark background.

Video Quality

PC Guide

Manage Video Quality

Users can optimize their video quality for meetings.

Users can set their video quality by clicking the performance icon on top. Other participants view videos of according quality.

Users may select among:

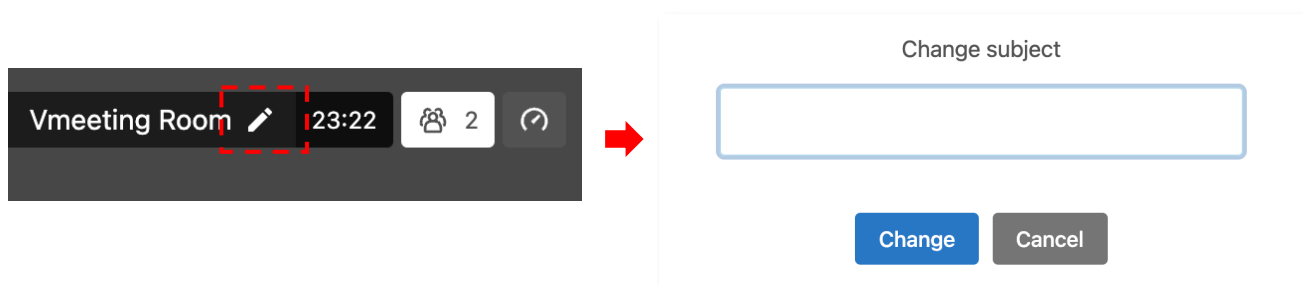

- Audio-Only (AUD, Camera is OFF)
- Low Definition (LD, 180p)
- Standard Definition (SD, 360p)
- High Definition (HD, 720p)

Please note that system may automatically downgrade video quality according to network connection.

More

PC Guide

Edit Meeting Subject

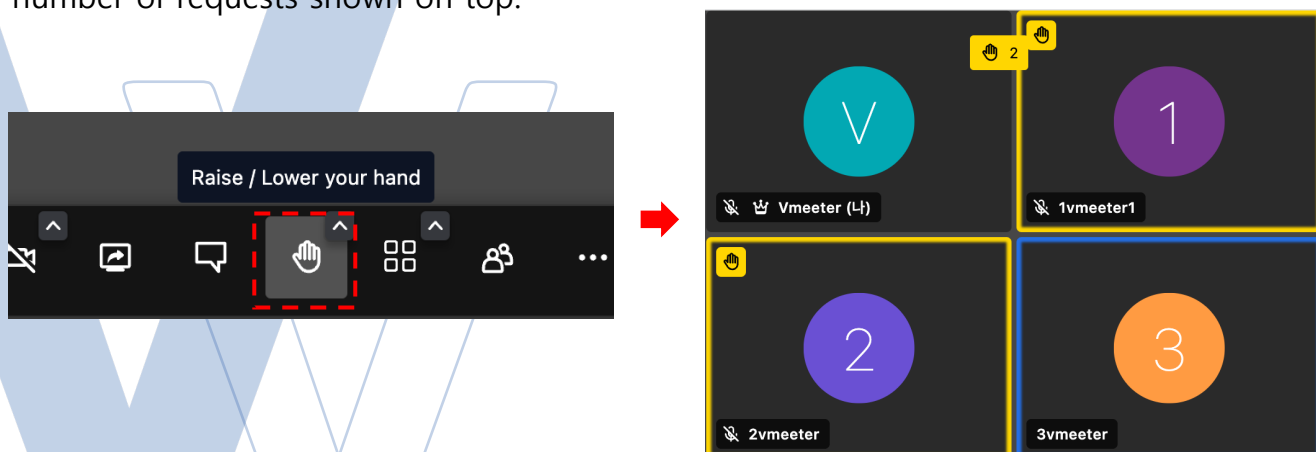

Select **Edit icon** on top of screen to edit meeting subjects.

※ Editing the Meeting Subject does not change the meeting URL.

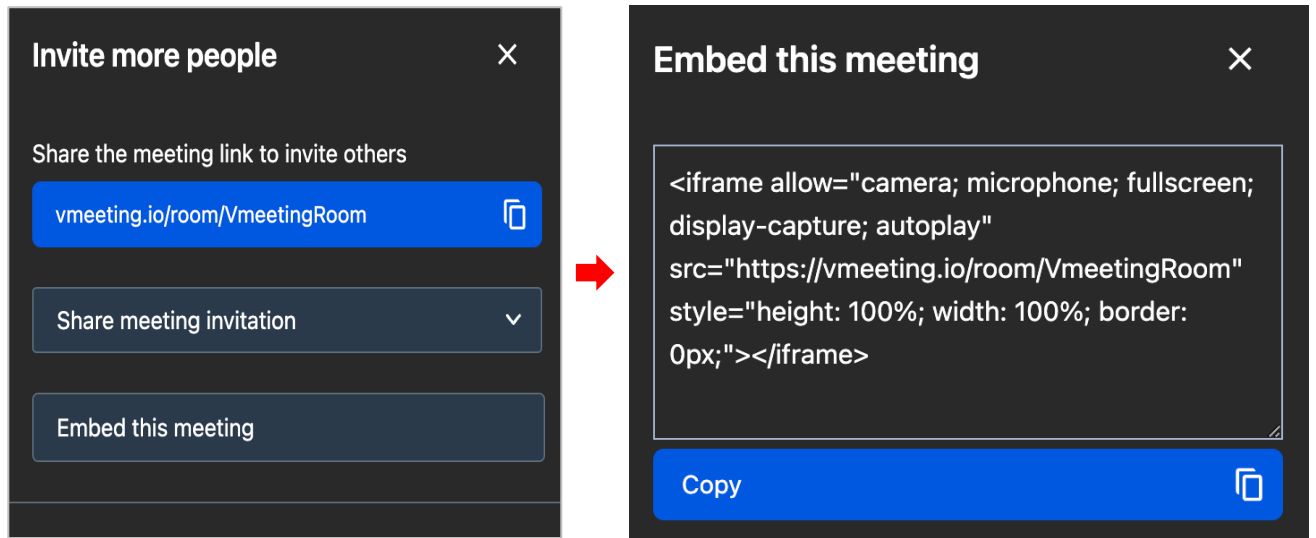

Raise/Lower Hand

Users can raise hand in order to request to speak.

Toggle **[Raise/Lower your hand]** to request/withdraw permission to speak. Once requested, yellow hand icon and outline will appear on the participant's tile, with total number of requests shown on top.

Invite - Embed Meeting (HTML)

Invite more people ✕

Share the meeting link to invite others

style="height: 100%; width: 100%; border: 0px;"></iframe>
```

Copy 

Users can embed meetings on web using HTML.

This can be done by copying HTML code from **[Participants] – [Invite Someone] – [Embed this meeting]** and pasting it on web. Users can participate meetings on web where it is embedded.

As a Host

As a Host

PC Guide

Host Controls

Vmeeting offers various features for hosts to efficiently manage meetings and participants.

Users are automatically assigned as hosts when they start a new meeting. Users can also receive host controls from another host.

1. Screen Recording
2. Live Streaming
3. Security Options (Lobby Mode/ Password)
4. Breakout Rooms
5. Tile View Settings (Layouts, Pin Participants)
6. Set Participants Default Audio/Camera Settings
7. Toggle [Everyone follows me]
8. Remove Participant (Kick-Out)
9. Assign Participant as host
10. End Meeting for all
 - Leave after assigning new host
11. Moderation Controls
 - Screen share, Mute, Camera, Chat, Polls, Rename, Assign to Breakout Rooms
12. Others
 - Random selection, Timer

Screen Recording

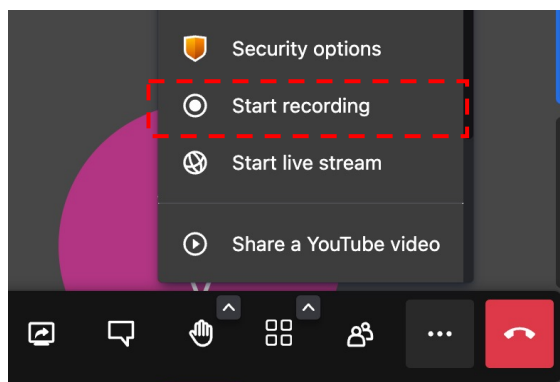

PC Guide

Screen Recording

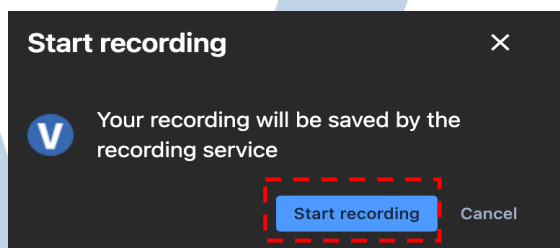

Hosts can record and download meetings.

When recording begins, a notification and REC icon is displayed. When host stops recording, the download URL is sent to the host's e-mail.

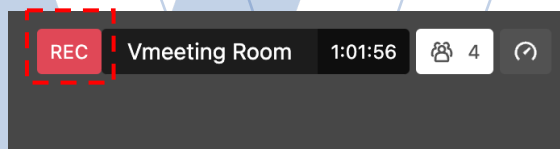

Start Recording

1. Click **[More Actions]** - **[Start recording]**

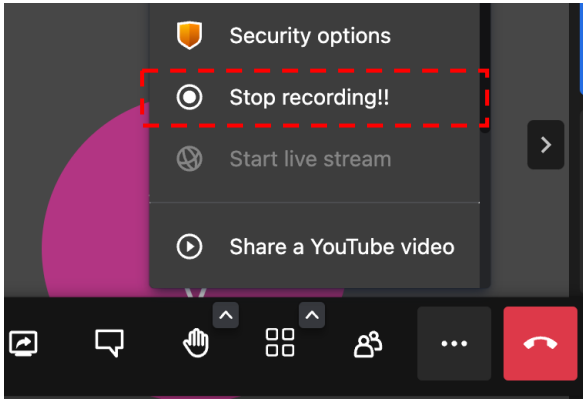

2. Select **[Start recording]**

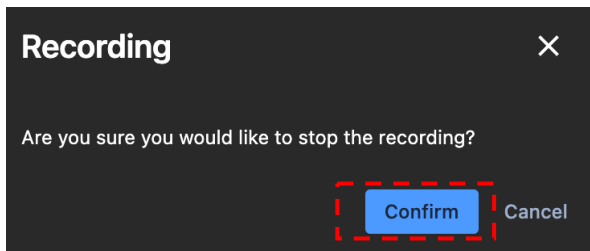

3. When recording begins, REC icon is displayed on top. All participants receive notification that host started screen recording.

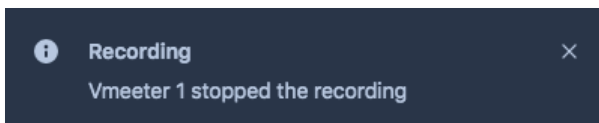

End Recording

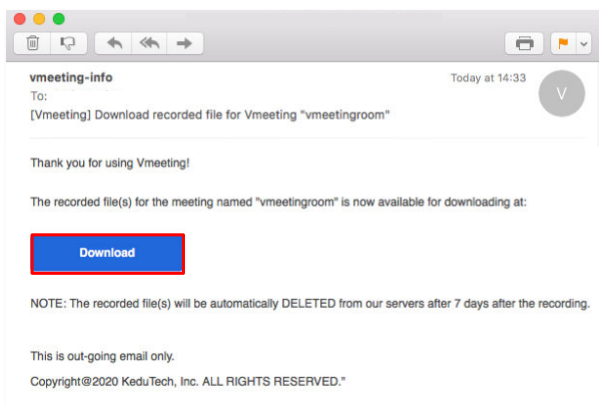

1. Click **[More Action]** - **[Stop Recording]**

2. Select **[Confirm]**

3. Participants are notified that recording is stopped. REC icon is no longer displayed.

4. Host receives download URL via mail.
(Recording is automatically stopped when meeting is closed.)

※ Only YouTube Video, Audio, Screen Sharing are recorded. Chat records are not recorded.

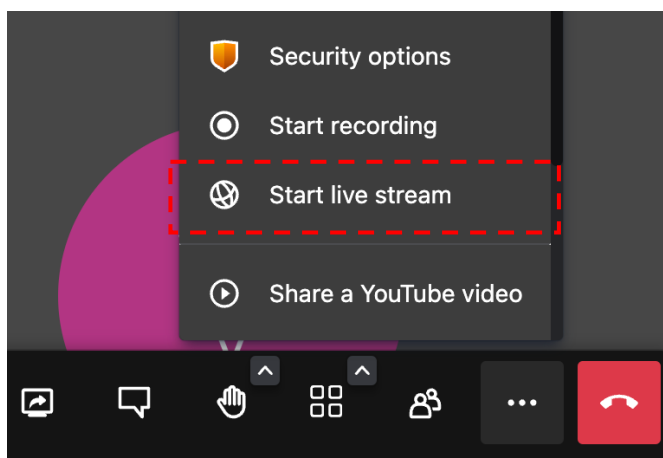

LIVE Streaming

PC Guide

LIVE Streaming

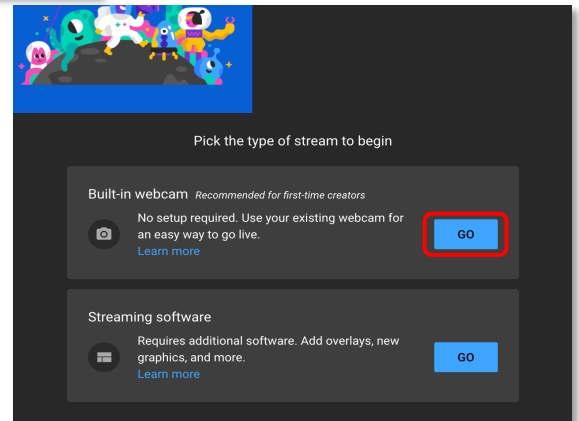

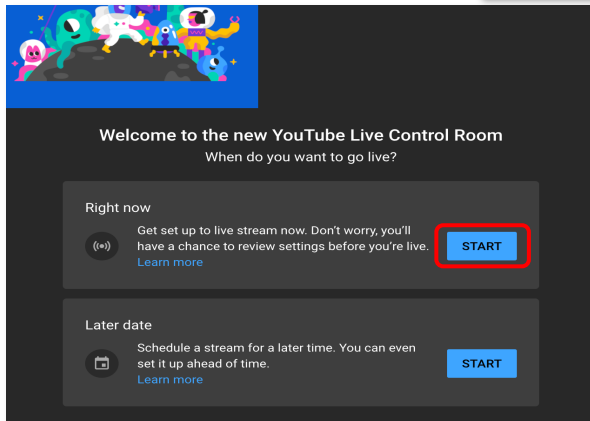

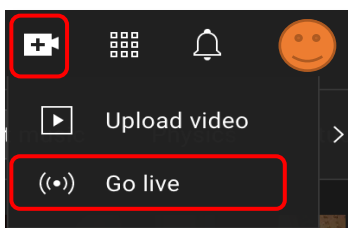

Vmeeting offers live steaming on various platforms including YouTube, NaverTV, AfricaTV, and Twitch via RTMP.

Click **[More Actions]-[Start live stream]** to start streaming.

YouTube Streaming

Meetings can be streamed live on Youtube.

1. Enter **YouTube** (<https://www.youtube.com>) from separate tab

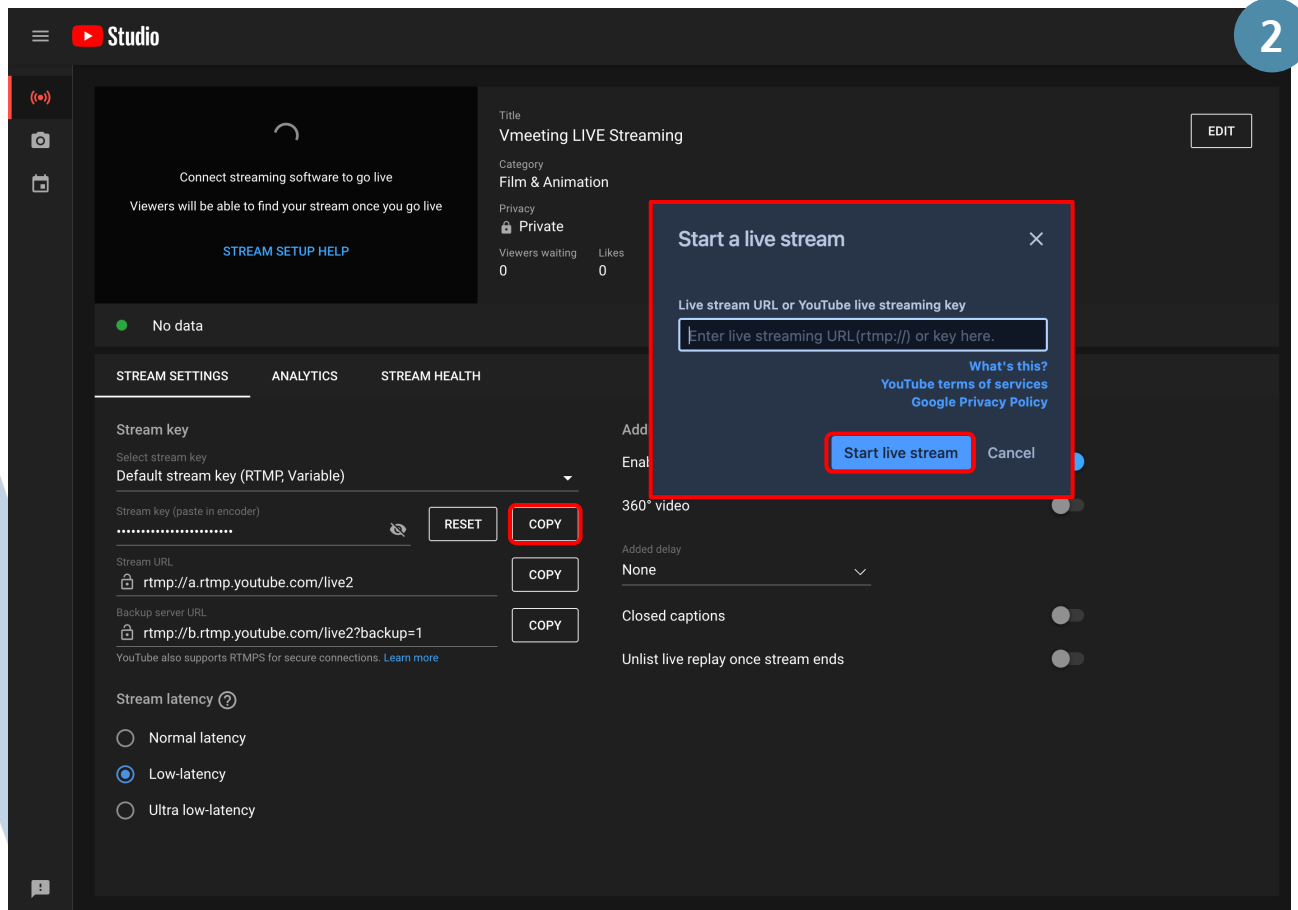

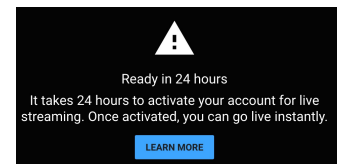

2. Click **[Create (Camera icon)]**

3. Select **[Go live]**

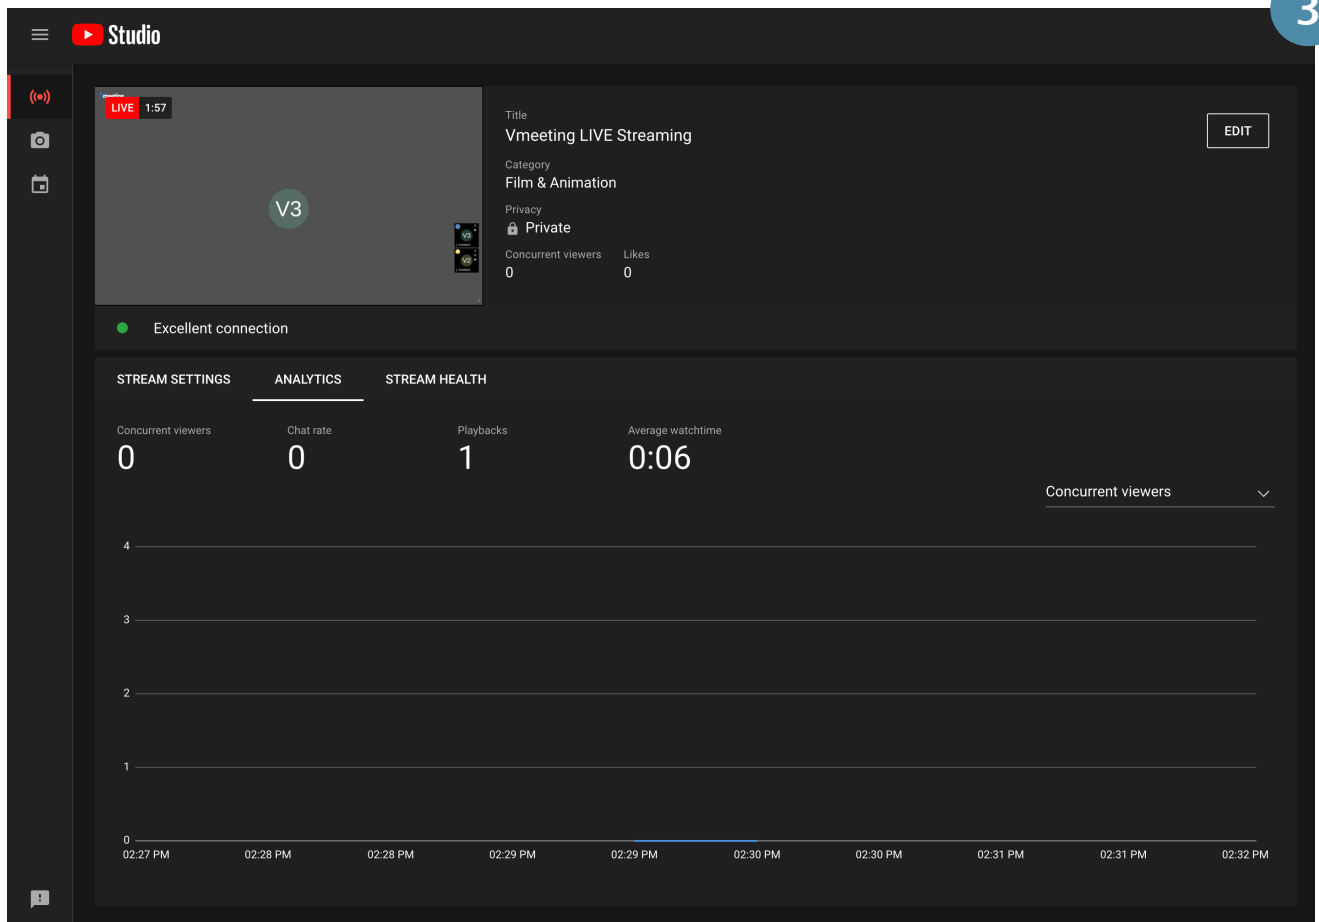

- User must create a YouTube Creator Studio Account and finish user verification before streaming. If this is your first streaming on YouTube, all streaming activities are limited for the first 24 hours.

4. Select [Stream] on the left panel to start streaming.

5. Edit necessary information including Title, Privacy, Category, etc.

8. Click (Default stream key) - **[Copy]** to retrieve stream key
9. Paste on 'Start live streaming' pop-up
10. Click **[Start live stream]** to begin streaming

11. Vmeeting meeting video is live streaming on YouTube

Live Streaming in other platforms

Users can easily follow similar procedures to stream Vmeeting live on other platforms.

Securities

PC Guide

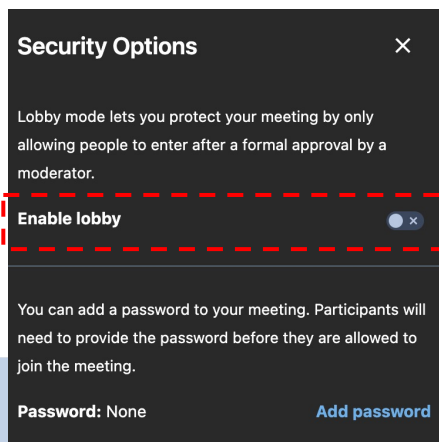

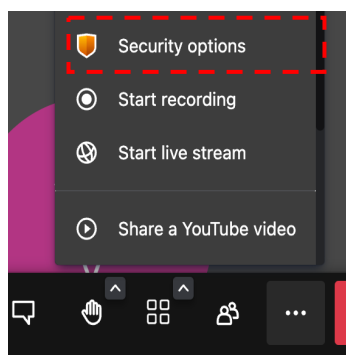

Securities

Users can toggle lobby mode or lock meeting rooms for security purposes.

- **Lobby Mode** : Only participants that the host approves can participate meetings.
- **Set Password**: Participants can only join after password verification

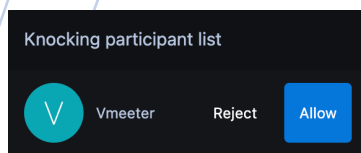

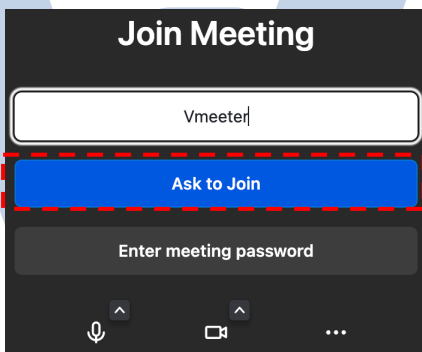

Lobby Mode

- Lobby Mode Setting

1. Click **[More Actions]**
2. Click **[Security Options]**
3. Security Options window
4. Enable Lobby – Switch on/off
 - Green(v) : Lobby Mode activated
 - Gray(x) : Lobby Mode deactivated

- Request to join the participant meeting

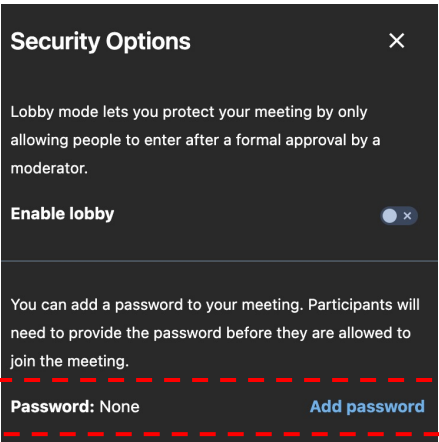

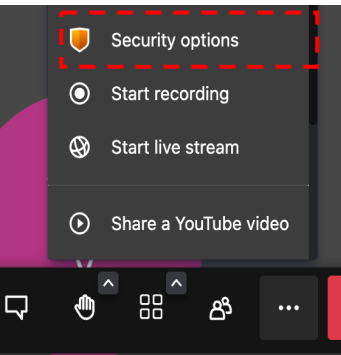

Once lobby mode is activated, participants must **[Ask to Join]**, and can only join after host approval.

If host disapproves participation, user is automatically sent back to lobby and notified.

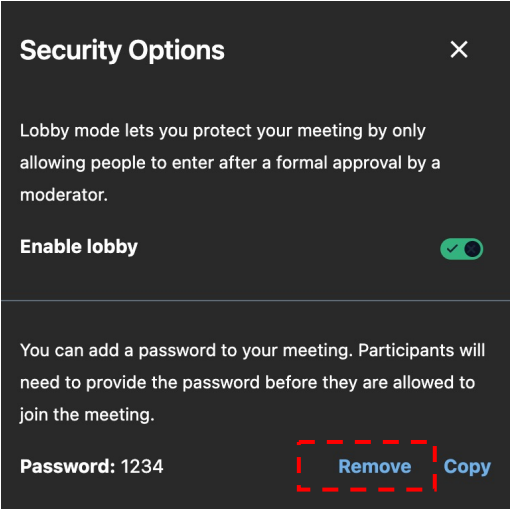

Set Password

- Set Password

- 1. Click **[More Actions]** - **[Security Options]**
- 2. Select 'Password' - **[Add Password]**
- 3. Enter password
- 4. Click **[Add]**

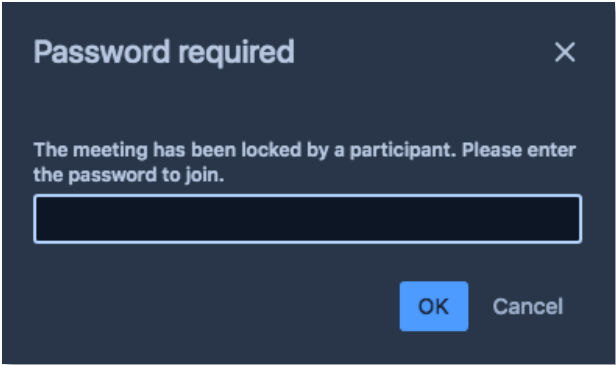

- Remove Password

- 1. Click **[More Actions]** - **[Security Options]**
- 2. Select 'Password' - **[Remove]**

- Request to join the participant meeting

Once password is activated, users must enter a password to join meeting.

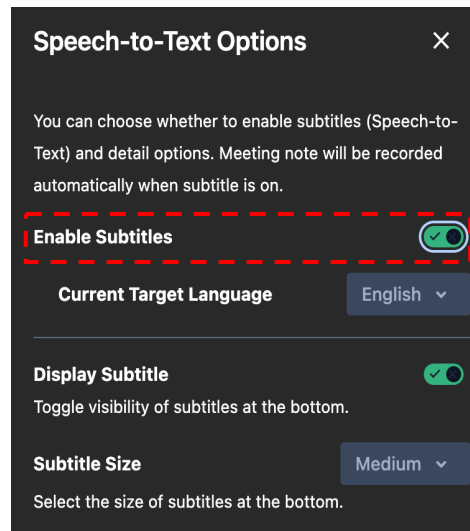

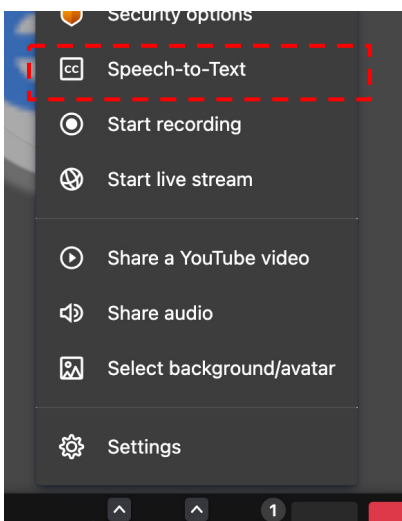

Subtitles/Translation

PC 가이드

Subtitle options

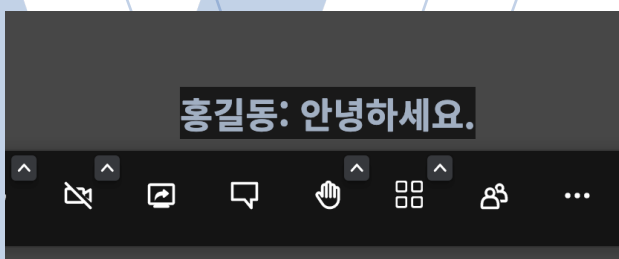

We provide a feature that uses AI voice recognition technology to display the speaker's voice as subtitles and translates the recognized voice into subtitles in real time.

- Subtitle Activation

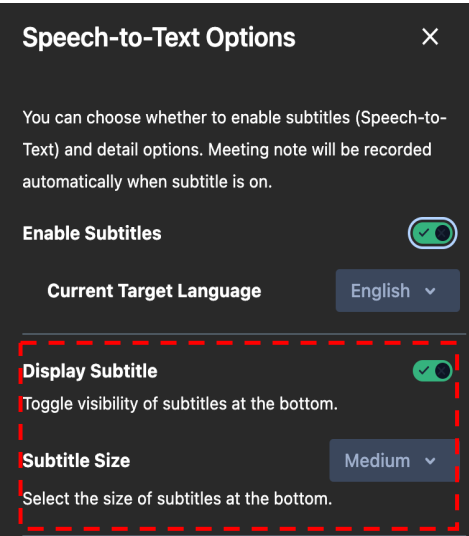

1. Click [More Actions]
2. Click [Speech-to-Text Option]
3. Subtitle option setting pop-up

4. 'Enable Subtitles' - select switch button
 - Green (v): Activate function
 - Gray (x): Disable function

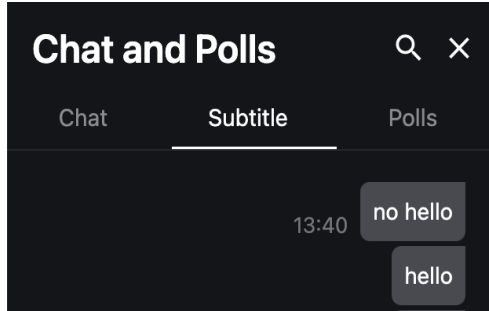

When the subtitle option is activated, voice-recognized subtitles are displayed at the bottom of the conference screen.

- Set subtitle options

- Current Target Language: You can select the language you speak and the language for voice recognition.
(Only Korean/English can be recognized)
- Display subtitles: Set whether or not to display subtitles at the bottom of the screen.
- Subtitle Size: You can set the subtitle size displayed at the bottom of the screen.

- Subtitle history

1. Click [Open/Close Chat]
2. Chat Window – Click [Subtitles] tab

Subtitles are accumulated and displayed from the time of subtitle activation.

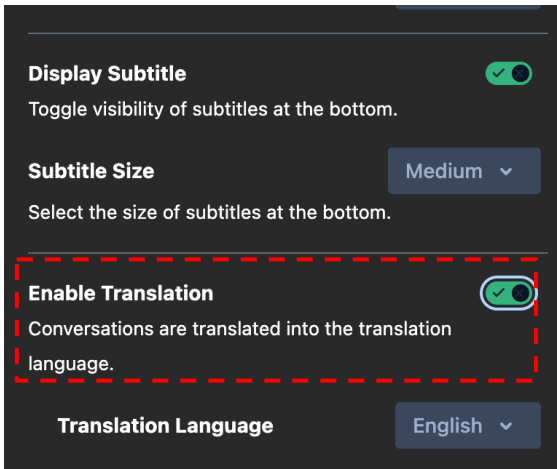

- Create meeting Note

Subtitles are automatically generated from the moment the subtitles are activated and are sent to the room owner (room creator) by email after the meeting ends.

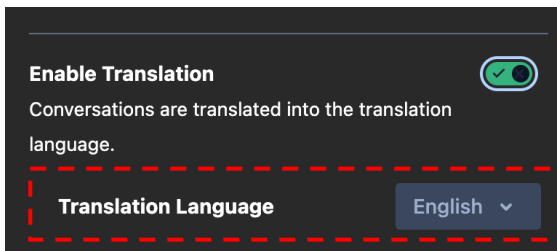

Translation Option

- Activate translation

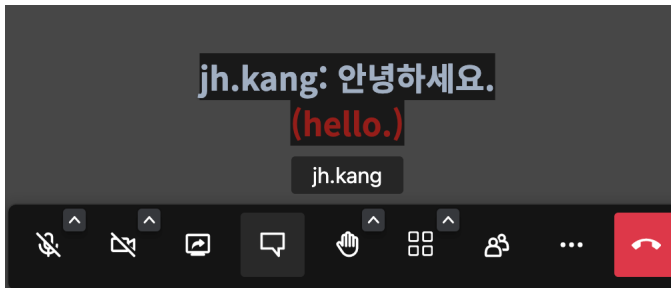

1. Click [More Actions]
 2. Click [Speech-to-Text Option]
 3. Subtitle option setting pop-up
 4. Select "Enable translation" - switch button
- Green (v): Activate function
 - Gray (x): Disable function

- Set translation language

- Translation Language: Select the language to be translated and displayed.

When the translation option is activated, voice-recognized subtitles and translated subtitles are displayed at the bottom of the meeting screen.

Breakout Rooms

PC Guide

Breakout Rooms

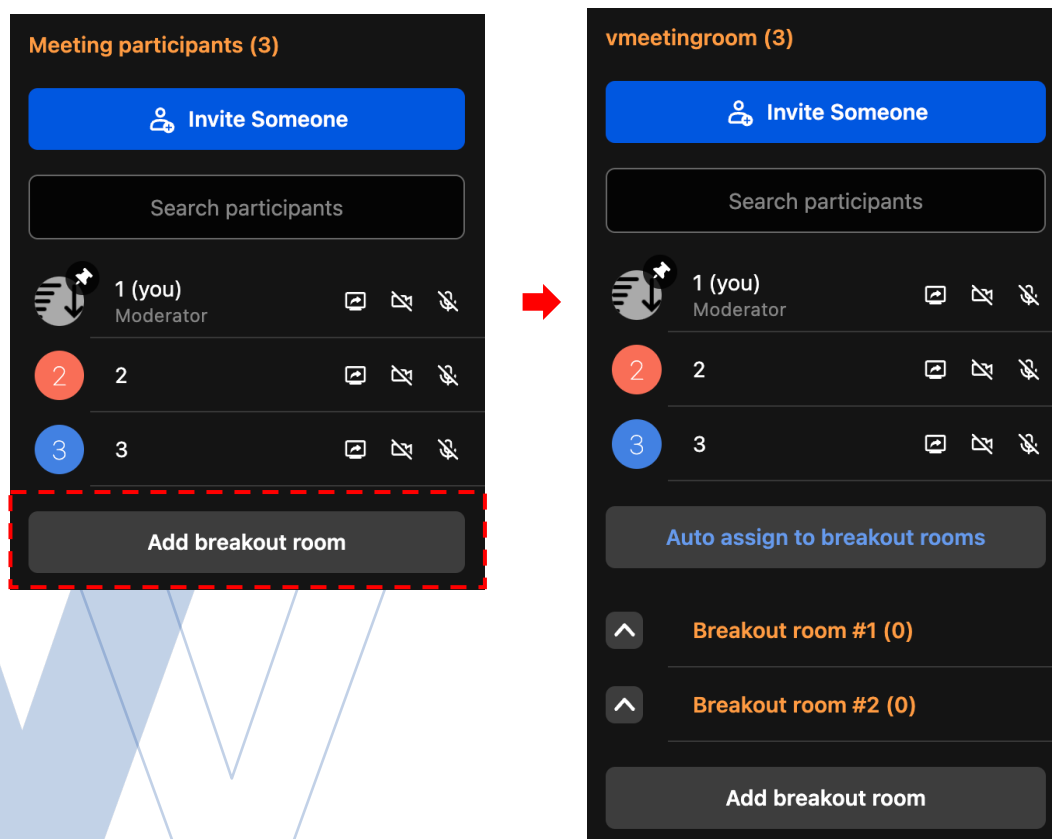

Users can split the main meeting into separate sessions.

Host can assign participants into sessions either manually or automatically. Participants can also choose to join sessions themselves. (Please refer to Moderation Controls)

Add Breakout Rooms

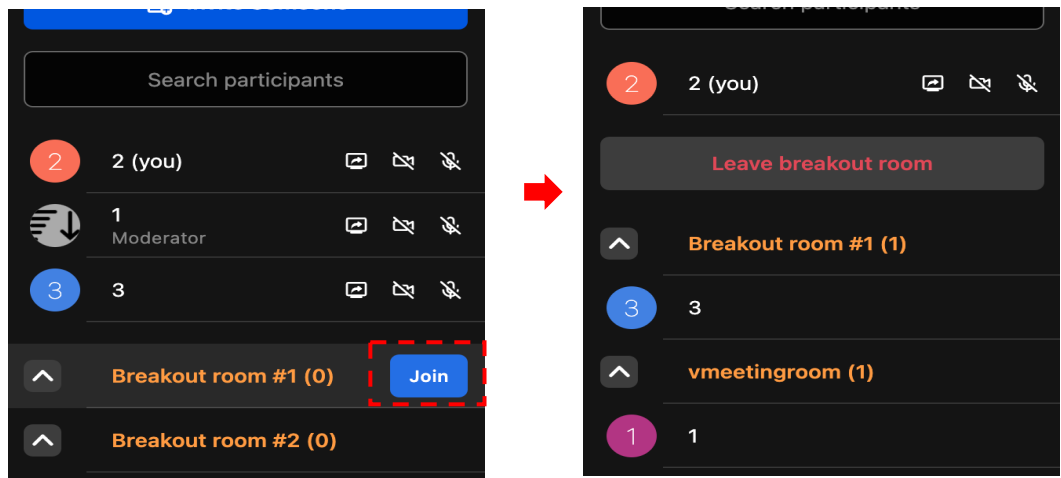

Add breakout rooms from **[Participants]** – **[Add breakout room]**.

Add Breakout room is a function that only the moderator can create.

Join Breakout Room

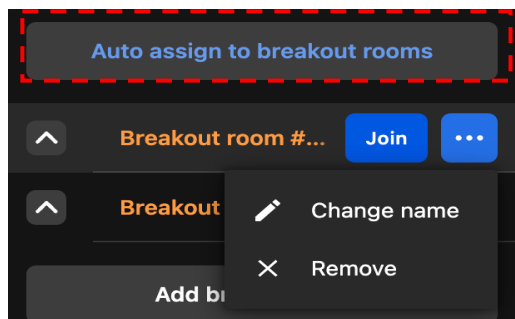

Join breakout room by clicking **[Join]**, over the room.
moderator can enter all Breakout rooms, and participants can enter according to the permission of the moderator.

Breakout Room Options

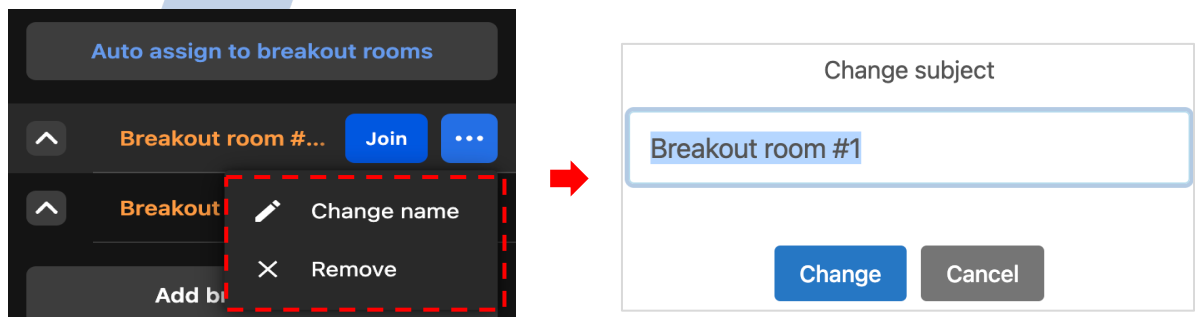

- Auto assign to breakout rooms

Assign participants automatically by clicking **[Auto assign to breakout rooms]**.

- Rename breakout room

Rename breakout room from **[More(...)]** – **[Change Name]**.

- Remove breakout room

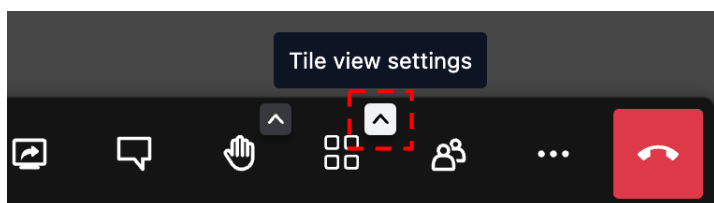

Remove breakout room from **[More(...)]** – **[Remove]**.

Tile view settings

PC 가이드

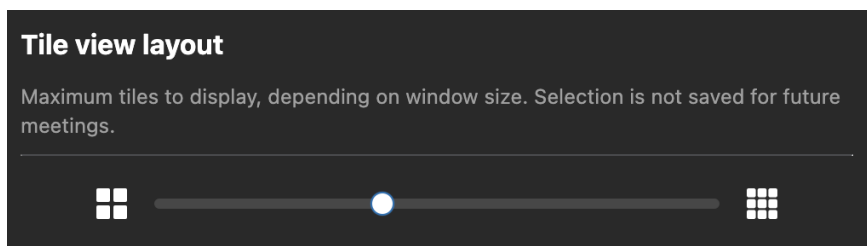

Tile view settings

Users can set tile layouts and lock certain participant(s) from **[Tile view settings]**.

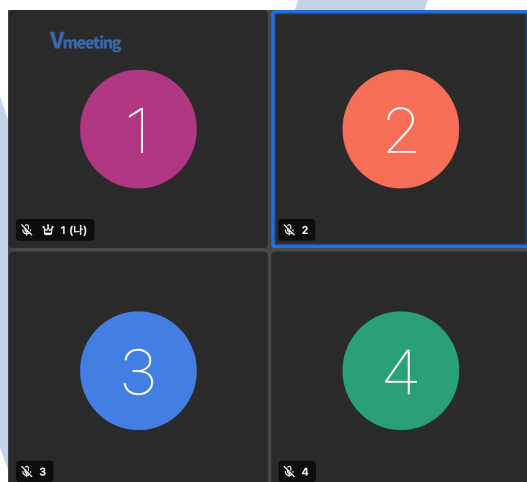

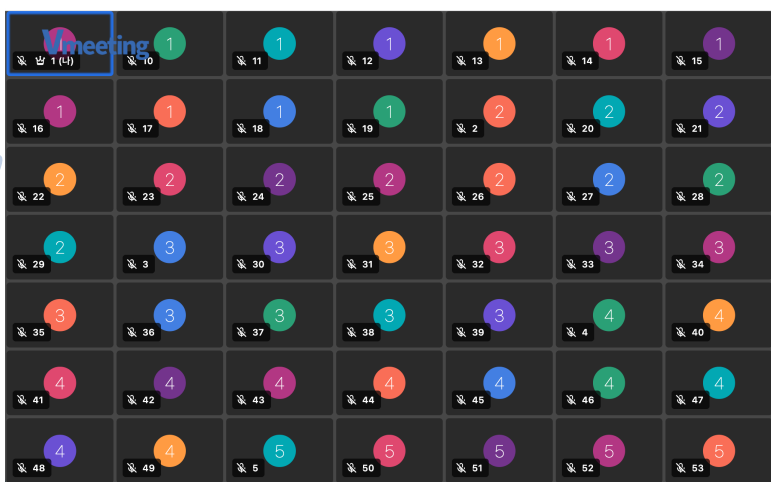

- Tile Layout

Tile layout can be set from '2 x 2' to '7 x 7'.

Example)

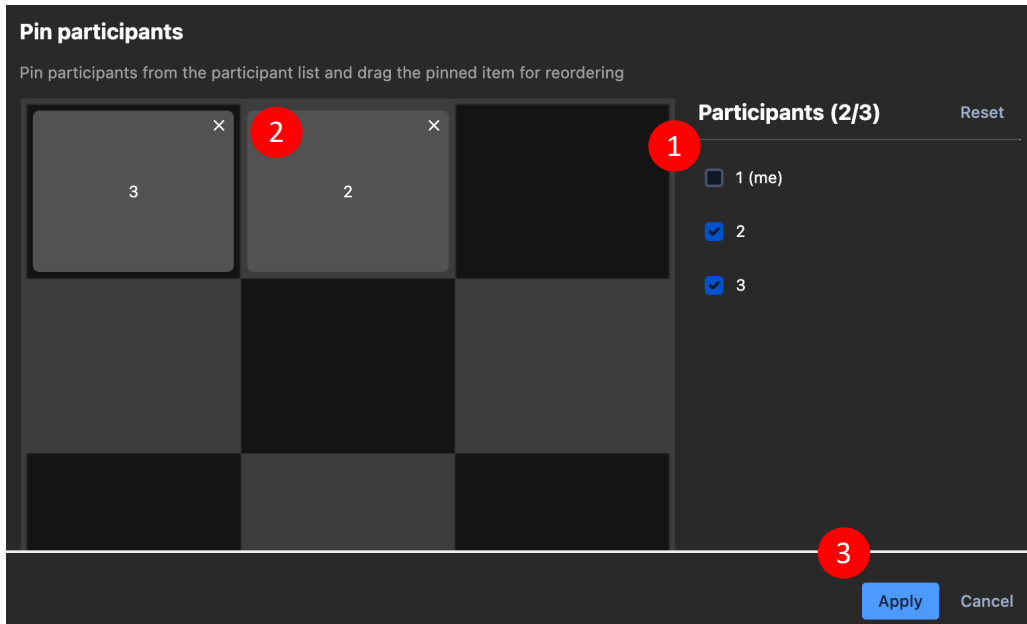

**[2x2]****[7x7]**

- Pin participants

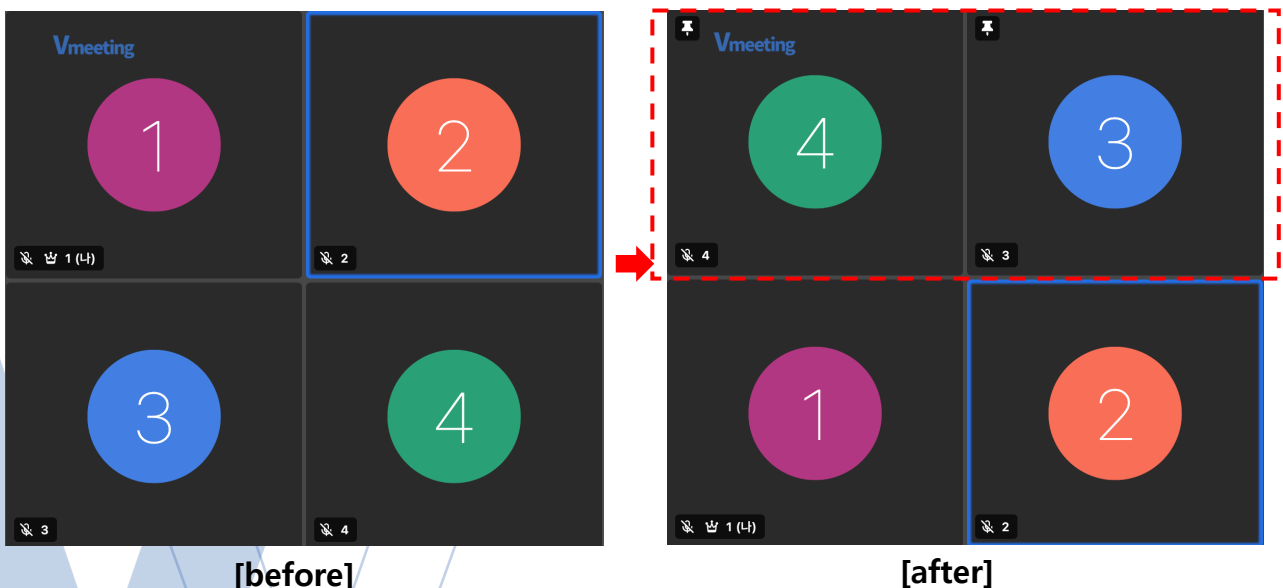

Users can select participants to lock from the participant list by ticking their name box. Once chosen, users can drag them to reorder.

- Lock method

1. Select a participant to pin from the participant list (check the checkbox)
2. Selected participants change the order by dragging
(Deselect with [X], [Reset] button)
3. Select the [Apply] button

Example)

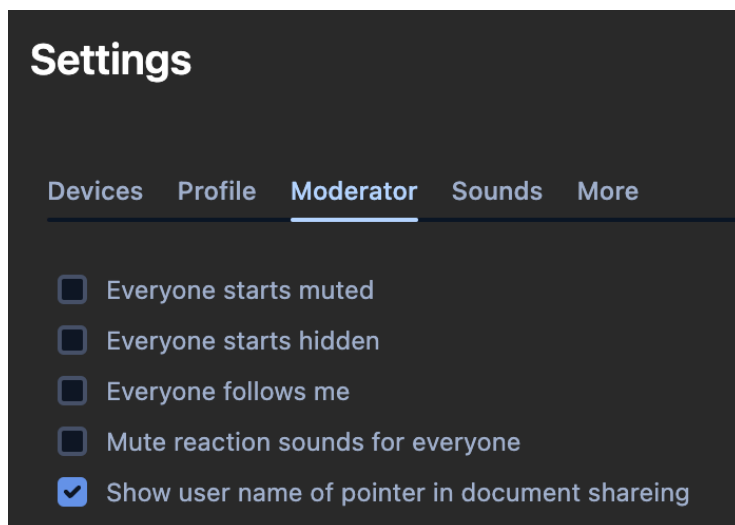

- ※ The number of participants to be locked will automatically change accordingly.
- ※ Pinning is reflected to all other participants' screen in the meeting room.

Etc (Host Controls)

PC Guide

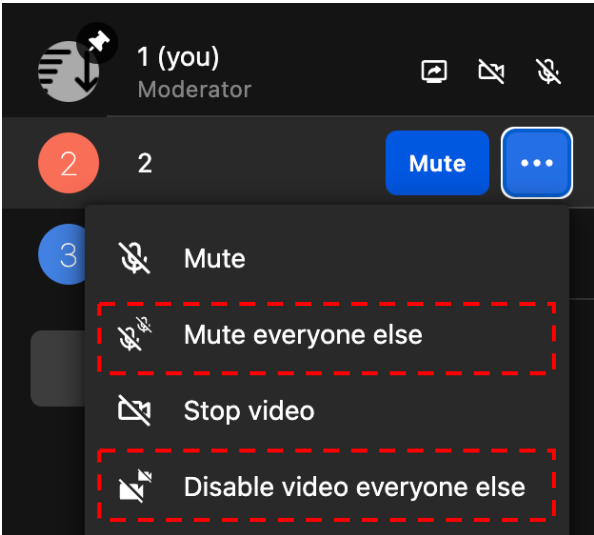

Settings - Moderator

Hosts can set and change default audio/camera settings for participants at **[More Actions]** - **[Setting]** - **[Moderator]** tab.

- **Everyone starts muted:** Everyone starts muted on joining the meeting.
- **Everyone starts hidden:** Everyone starts with camera turned off on joining the meeting.
- **Everyone follow me:** Everyone's screen follows that of the host.
ex) If a host toggles to tile view mode, it is reflected on everyone's screen accordingly.
- **Mute reaction sounds for everyone:** Reactions sounds are muted for everyone
- **Show user name of pointer in document sharing :** Host can choose to display all user's mouse pointer with each user's name tagged along on a shared document. To enable/disable this option

Mute/Disable Video for Everyone Else but a Specific User

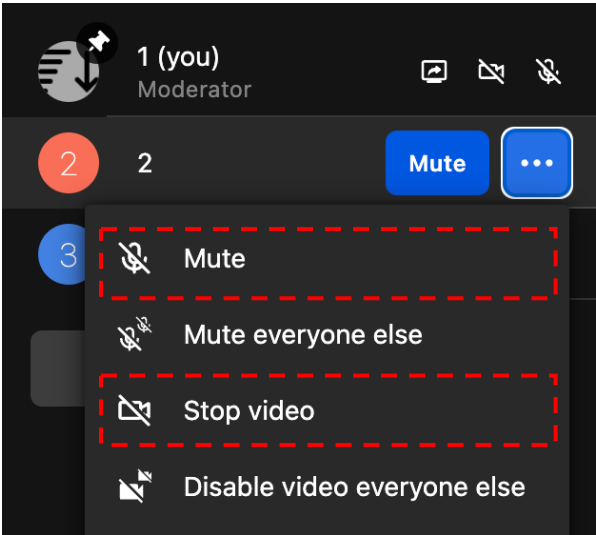

Hosts can use **[Participants]** - Individual **Settings(...)** – **[Mute everyone else]** to turn OFF all audios except for that of a selected participant.

This can be also done on **[Settings(...)]** on user tile-view.

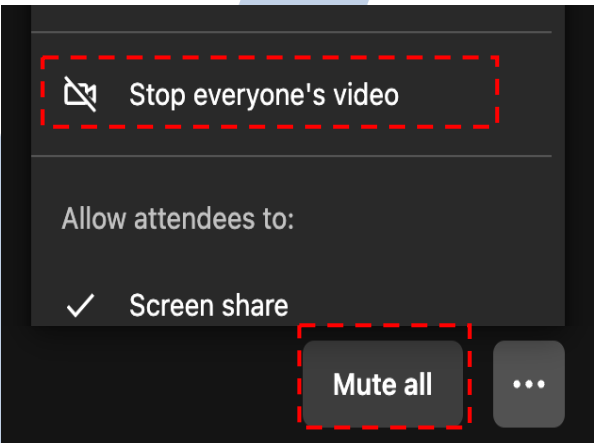

Mute/Stop Video for Specific User

Hosts can use **[Participants]** - Individual **Settings(...)** – **[Mute]** to mute, or **[Stop Video]** to disable video for specific users.

This can be also done on **[Settings(...)]** on user tile-view.

Mute All/Stop everyone's video

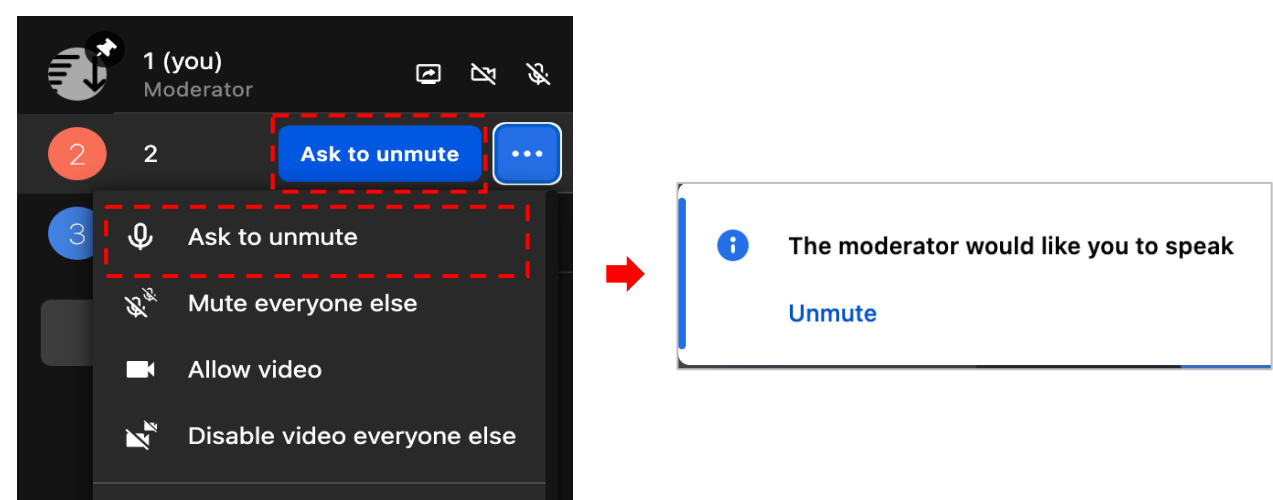

Hosts can select **[Participants]** - **[Mute all]** to mute all participants or select **[Participants]** – **[Settings(...)]** - **[Stop everyone's video]** to turn all cameras off.

Ask to unmute

Host can ask to unmute selected participants from **[Ask to unmute]** button/
[Participants] - Individual **Settings(...)** - **[Ask to unmute]**.

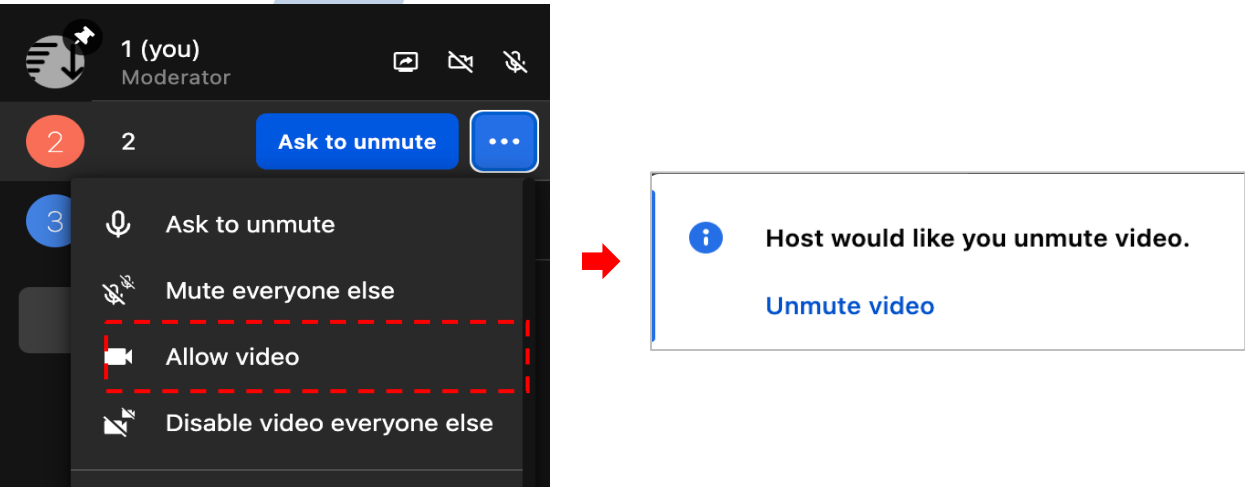

Selected participants will receive an alert to unmute and will be unmuted on clicking **[Unmute]**.

Allow Video

Host can ask to unmute video for selected participants from **[Participants]** - Individual **Settings(...)** - **[Allow video]**.

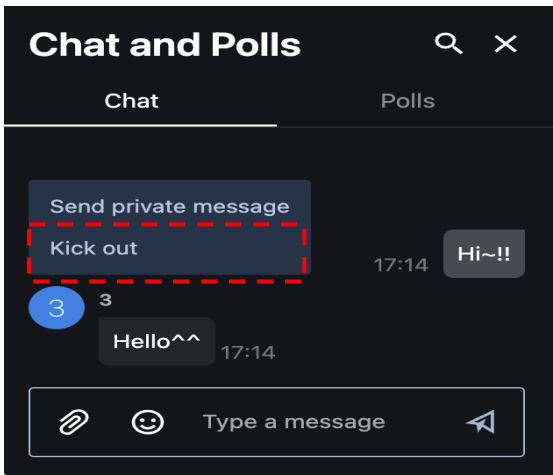

Selected participants will receive an alert to unmute video. Video will be turned on if the participants click on **[Unmute video]**.

Kick-out User

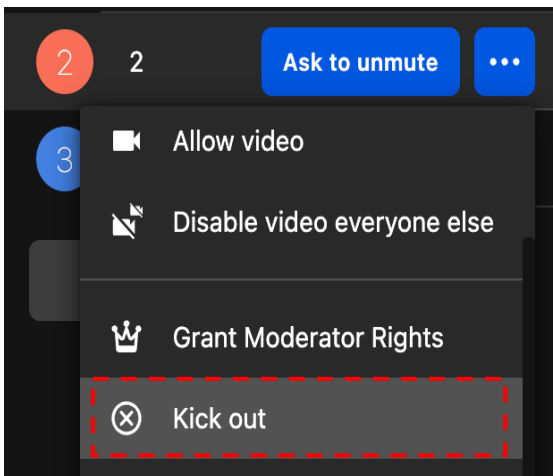

Host can remove participants from meeting. This can be done from Chat, Participants or User Tile-View.

- Chat

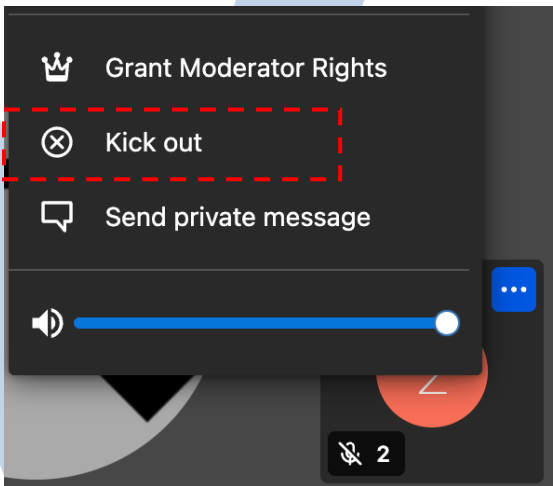

Select **Open Chat - Setting(...)** - **[Kick-out]** to remove user from meeting.

- Participants

Select **Participants - Setting(...)** - **[Kick out]** to remove user from meeting.

- User Tile-View

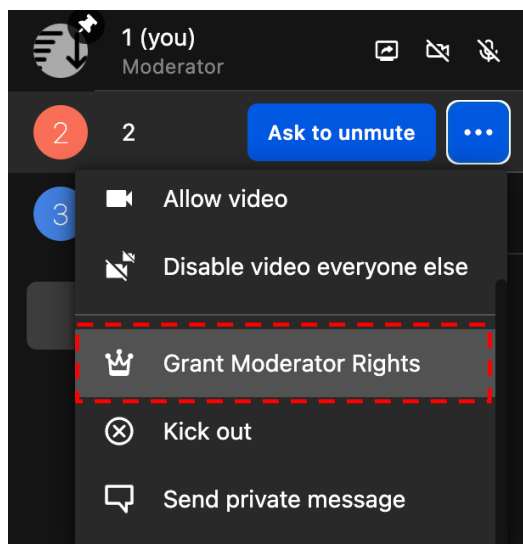

Select **Setting(...)** - **[Kick out]** from user tile-view to remove user from meeting.

Assign new host

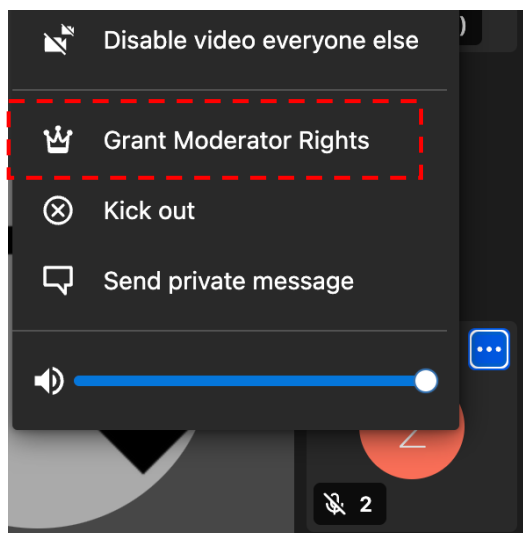

Hosts can assign new host for current meeting.

- Participants

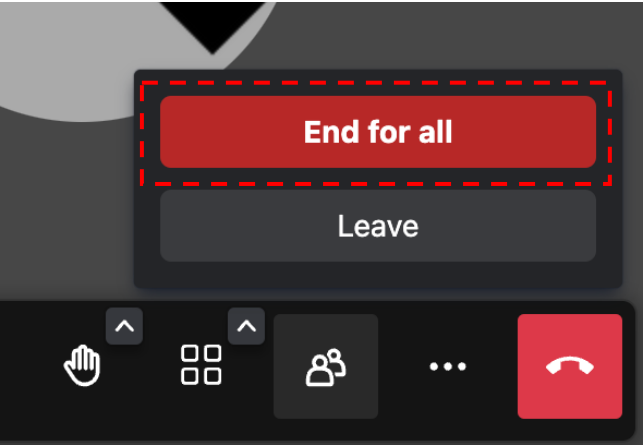

Select **Participants- Setting(...)** - **[Grant Moderator]** to assign user as new host.

- User Tile-view

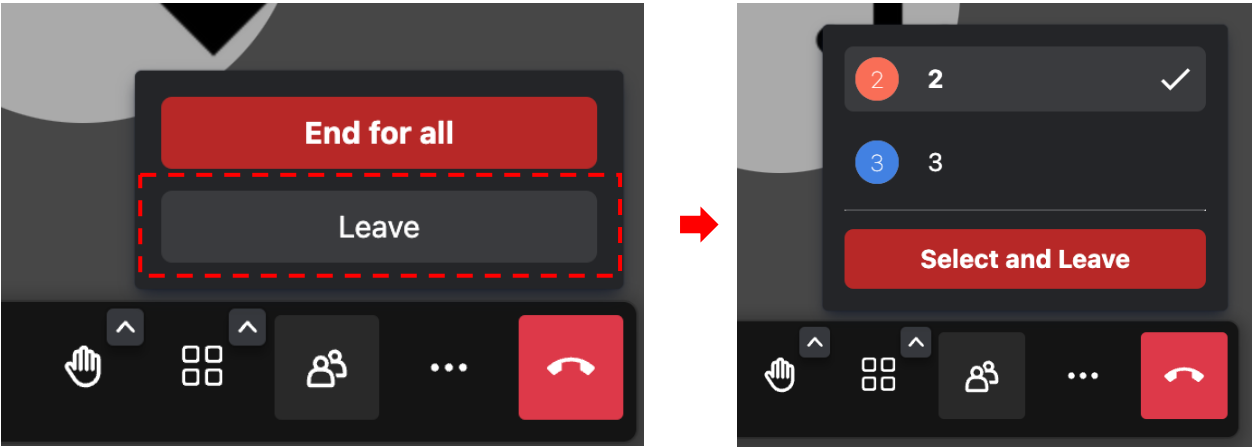

Select **Setting(...)** - **[Grant Moderator]** from user tile-view to assign user as new host.

End Meeting for All

Hosts can select **[End for All]** to end meeting at exit. All participants are automatically dismissed from meeting.

Select and Leave

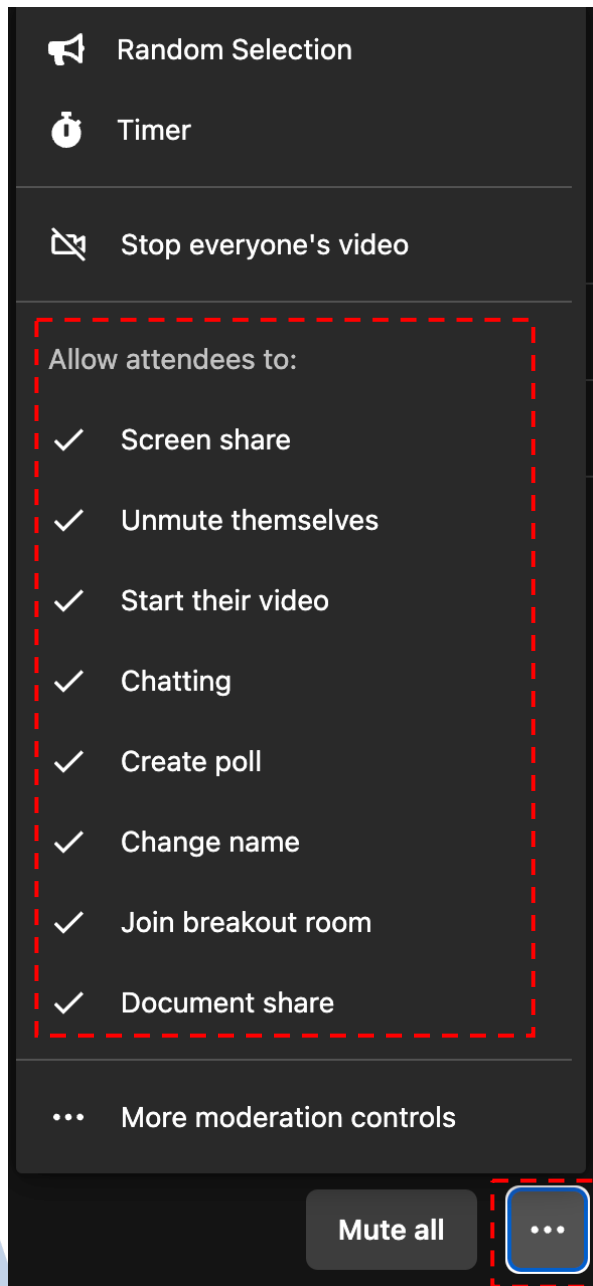

Hosts can also select **[Leave]** to assign a new host before exiting the meeting room. Remaining participants may continue the meeting with the newly assigned host.

Moderation Controls

Host can allow certain rights to attendees for meetings.

Moderation controls can be set from **Participants – More(...)**.

- **Screen share** : allows attendees to share their screens.
- **Unmute themselves** : allows attendees to unmute without host's approval.
- **Start their video** : allows attendees to turn their video on without host's approval.
- **Chatting** : allows attendees to chat.
- **Create poll** : allows attendees to create polls.
- **Change name** : allows attendees to rename themselves.
- **Join breakout rooms** : allows attendees to join breakout rooms themselves.
- **Document share** : allow participants to share documents.

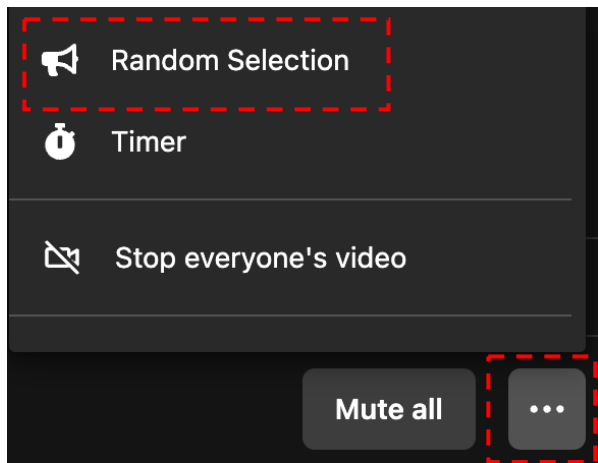

Once disabled, all other participants will only be able to view the document and will not be able to start and end document sharing.

(Disable Upload Document, Download, Delete, Whiteboard)

Random Selection

Users can randomly select one participant. On completion, the selected participant's screen will be pinned. This can be used to assign a presenter, play games, etc. and is only active and when 3 or more users are present.

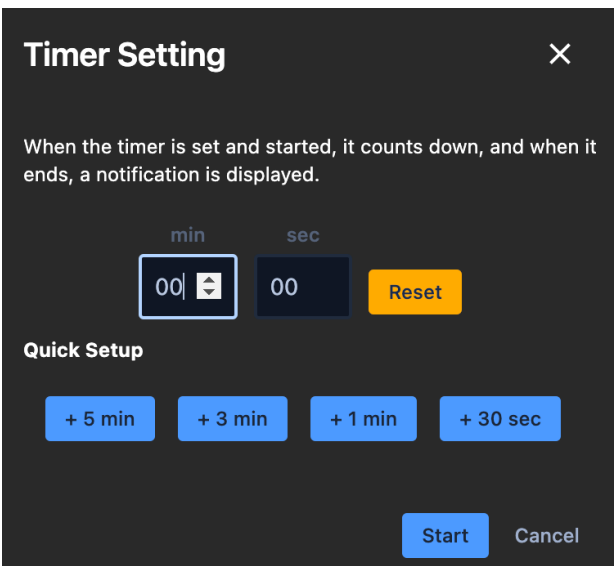

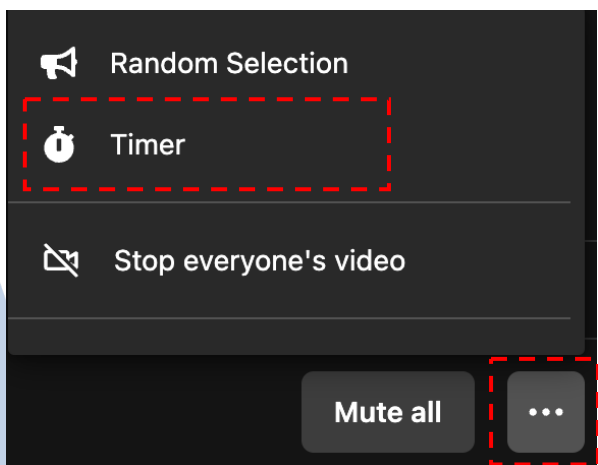

Use random selection from **Participants – More(...) – Random Selection**.

Timer

Users can set a timer. A notification is displayed when it ends. This can be used to set a presentation duration, self study times etc.

Use timer from **Participants – More (...) – Timer**.

Etc.

FAQ

PC Guide

Do you need an account to use Vmeeting?

- A Vmeeting account is not required for those who only participate in a meeting. However, an account is necessary to host or start a new meeting.

How do you purchase a license for Vmeeting?

- Contact vmeeting-info@kedutech.kr for support.

How do you join a meeting?

- You can simply join by clicking on a meeting URL or entering a meeting name at vmeeting.io.

Do you need a webcam to join a meeting?

- Vmeeting does not require users to connect webcam device to participate in a meeting.

How many participants can join the meeting?

- Vmeeting supports up to 10 participants for free. To host larger meetings, you must purchase a license for Vmeeting which can support up to 500 participants. Please contact vmeeting-info@kedutech.kr for more information.

How do I reset my password?

- You can reset your password at [Login] – [Reset Password].

Why can't I use some features?

- Some features may not be available depending on your OS or web browser. Features may also vary between web and application.

My camera/microphone is not working.

- Make sure that your device is connected to your PC and selected as the main video/audio input. If device is still not working, please check if it is already being used. Devices cannot be used in multiple applications concurrently. If it is not being used, please check the device accessibility at settings as instructed as below:

■ Windows

1. Enter [Start Menu > Setting > Privacy> Camera/Microphone]
2. Turn on [Allow Camera/Microphone Access for this device].
3. Turn on [Allow apps to access your camera/microphone].
4. Allow access for browser under [Choose which apps can access your camera/microphone].

■ macOS

1. Enter [Menu> System Preferences...> Security & Privacy> Privacy].
2. Allow camera/microphone access for browser.

How can I prevent echo during meeting?

- Echo can occur when users connect meeting audio with multiple devices or when multiple users join meeting at the same location. To prevent this, make sure to leave only microphone and speaker on per meeting.
- You can also minimize additional noise by turning microphone off when not speaking.

I can't share my screen. (macOS)

- If screen sharing results in an error message or black screen, please check the screen recording accessibility for browser as instructed below. Screen sharing cannot be performed without screen recording access.

■ macOS

1. Enter [Menu> Systems Preferences... > Security & Privacy > Privacy].
2. Allow Screen Recording access for browser.
